Program Preface and Components

Words are the tools we use to think, to express ideas and feelings, and to learn about the world. Because words are the very foundation of learning, improving students' vocabulary knowledge has become an educational priority. Student word knowledge is strongly linked with academic accomplishment, because a rich vocabulary is essential to successful reading comprehension. Furthermore, the verbal sections of the high-stakes standardized tests used in most states are basically tests of vocabulary and reading comprehension.

*Wordly Wise 3000*, Second Edition, has been designed to help students in kindergarten through grade 12 meet state standards for vocabulary and reading comprehension. By using the lessons in the Student Book, as well as the tools, strategies, and techniques provided in the Teacher's Resource Book, you can make vocabulary development an effective part of your students' instruction.

Program Components

- **Student Books** (K–12)
- **Picture Cards** (K–1)
- **Concept Cards** (K–1)
- **Answer Keys** (2–12)
- **Teacher's Resource Books** (K–1)
- **Teacher's Resource Books** (2–12)
  - Teacher's Guide
  - Student Book Answer Key
  - Lesson Review Exercises
  - Lesson Review Answer Key
  - Tests
  - Tests Answer Key
  - Word List
- **Test Generator** (2–12)

The purpose of this Teacher's Resource Book is to provide you with the knowledge and tools you need to increase and improve your students' vocabulary. It begins with the Teacher's Guide, which presents research-based information and proven techniques for vocabulary development as well as specific information and guidelines for using the lessons in Book 5. Following the Guide is an Answer Key to the exercises in the Student Book.

This Teacher's Resource Book also provides review and assessment tools. An additional exercise to use with the Passage is new to the Second Edition and gives you more flexibility in your teaching. You can use it for review or in place of the more challenging final exercise in the lesson. There are also reproducible Tests for each lesson, and Answer Keys for all.
Part 1

What Is Good Vocabulary Development?

Why Vocabulary? Why Teach It?

The Wordly Wise 3000 series focuses on improving students' vocabulary by furthering their understanding of new words and concepts. Studies have shown that reading comprehension and vocabulary knowledge are strongly correlated, and researchers have found that word knowledge in primary school can predict how well students will be able to comprehend texts they read in high school. Limited vocabularies prevent students from comprehending a text.

Poor readers often read less, because reading is difficult and frustrating for them. This means they don't read enough to improve their vocabularies, which could help them comprehend more. This perpetuating cycle can mean that as students continue through middle school and high school, the gap between good and poor readers grows wider.

Direct instruction in vocabulary can help break this cycle. Good readers often acquire much of their vocabulary through wide independent reading, also known as incidental learning. However, explicit instruction can help students learn enough words to become better readers (and thus acquire even more words). Direct vocabulary instruction is useful for students at all ability levels, but it is particularly useful for beginning students who have a limited reading vocabulary and little exposure to incidental vocabulary learning outside of school.

The average student learns about 3,000 words a year, or six to eight words per day—a remarkable achievement! If students are taught new words at a rate of eight to ten words per week for 37 to 50 weeks, about 300 to 500 words per year can be taught through direct instruction. This leaves a large portion of words to be learned through independent reading, which is essential to acquiring word knowledge.

Although the percentage of words learned through direct instruction may seem small, it is significant. Steven A. Stahl has pointed out that for students at the lower end of the vocabulary range, who learn perhaps 1,000 words a year, a gain of 300 words equals a 30 percent increase, and that for average
students a gain of even 10 percent is educationally significant—especially if it is repeated year after year. Experts agree that a combination of direct instruction, discussions, and encouragement of wide reading is the best way to help students develop vocabulary.

In this new edition of Wordly Wise 3000 (K–12), we recommend direct instruction at the primary levels (K–1), more student-centered guidance and coaching at the middle levels (2–6), and more independence at the upper levels (7–12) of the program. Of course, more direct instruction and scaffolding may be warranted at the middle and upper levels with struggling readers and English language learners.

What Should Direct Instruction Include?

So, how do we teach students to acquire words? According to various authorities, effective vocabulary instruction should include definitional and contextual information about a word; multiple exposures to a word in different contexts; and encouragement of students’ active participation in their word learning.5

Definition and Context

Traditionally, vocabulary instruction has focused on having students look up word meanings and memorize them. This teaching approach, however, provides only superficial and short-term learning of words. Students who simply memorize word meanings frequently have trouble applying the information in definitions and often make mistakes about the meanings.6

To know a word, students need to see it in context and learn how its meaning relates to the words around it. An approach that includes definitions as well as context can generate a full and flexible knowledge of word meanings. When students are given several sentences that use a word in different ways, they begin to see how a word’s meaning can change and shift depending on its context. For example, consider the changes in the word got, as it appears in the following sentences:

Emilio got a cold.
Emilio got rich.
Emilio got a note from Dashiell.
Dashiell got in trouble.

Although in most of these examples, got conveys the idea of receiving, the meaning is slightly different in each one. Based on the concept that students
need to see words in different contexts in order to learn them, each lesson in Wordly Wise 3000 (2–12) provides definitions of the vocabulary words and multiple examples of their use in context.

Repeat, Repeat, and Repeat

Students benefit from seeing the same word several times. Word meanings are accumulated gradually. A word that is encountered once has about a 10 percent chance of being learned from context. When students see a word repeatedly, they gather more and more information about it until they acquire an idea of what it means. Dale and O'Rourke have summarized the four stages of word knowledge as follows:

1. I never saw it before.
2. I've heard of it, but I don't know what it means.
3. I recognize it in context—it has something to do with . . .
4. I know it.

The more exposure students have to a word, the more likely it is that they will be able to define, comprehend, and remember it. Good vocabulary instruction builds repetition into the learning process, so that students can learn more words more quickly. Each lesson in Wordly Wise 3000 Books (K–12) asks students to use and apply several examples of the lesson's words in different contexts as they complete the exercises.

You Can Do It! Emphasizing Active Processing by Students

Students remember words better when they connect new meanings to knowledge they already have. This type of active processing occurs when students work with words in some of the following ways:

- produce antonyms and synonyms
- rewrite definitions
- identify examples and non-examples of the word
- use more than one new word in a sentence
- create sentences that contain the new word

Each of the above activities reinforces definitional or contextual information about the word and gives students a chance to own the word for themselves. Group discussion of word meanings also helps students learn new vocabulary by having to actively participate in their own learning. More will be said about the importance of discussion in vocabulary instruction in Part 2 of this Guide (see page 23).
Each lesson opens with a word list that gives each word's definition(s), pronunciation, and sentences showing the words in context. Sentences provide directional context clues to the word's meaning (not just random information).

Since words are generally acquired in word families (or as roots), related word forms are provided in boldfaced type where appropriate.
The introduction of the vocabulary words is followed by five exercises per lesson to reinforce the meanings of those words. These exercises provide students with practice in applying the definitional or contextual information they have just seen in the word list, helping them strengthen their understanding of each word's meaning.

In the first exercise, Finding Meanings, students draw on their knowledge of the words' definitions to form sentences. The repeated use of words through this exercise and the ones that follow helps students build a full and flexible understanding of the vocabulary words.
In the second exercise, Just the Right Word, phrases expressing the meanings of vocabulary words are highlighted in sentences; students replace them with the correct word from the word list.

In Applying Meanings, the third exercise, students answer questions that use the vocabulary words in a specific context. To select the correct answer, students need to use their full knowledge of each word’s meaning.

The vocabulary words appear in a box on every two-page spread in the lesson so that students do not have to flip back to the Word List to see their word choices.

The fourth exercise provides more sophisticated word study. In the Word Study activity, students may identify synonyms and antonyms, explore how prefixes and suffixes change word meanings, learn about Latin or Greek word roots, or distinguish between homophones.
Off You Go into the Wild Blue Yonder

After ten weeks of flying lessons, which is about the average instruction period, you’re ready to take your first solo flight. Today, your instructor will be on the ground instead of sitting beside you. When you arrive at the airport, you see a glass building outside the hangar and ask the guard you have a flight today. As the two of you talk, you try to sound as confident as possible, even though your heart is racing. The most you know how serious you are because the instructor has a complete confidence in you. That makes you feel better, and you begin to relax a little at the end of your 20-minute wait.

After drinking coffee and taking a deep breath, you methodically complete the checklist of the plane controls. Then, you wait for a sign from the control tower to proceed. As soon as it comes, your feelings of anxiety leave you. You start the engine and reduce the brake. You open the throttle a little, feeling more gasoline into the engine and causing the propeller to start turning. The plane starts to move forward. You roll onto the runway, bringing you the wind, and wait.

A voice from the control tower comes through your headphones, giving you permission to start the engine. You open the throttle wide, and the plane accelerates down the runway. Your right hand rests on the “throttle” control that blips the plane’s nose when pulled back and drops the nose when pulled forward. The plane is now traveling so fast that you can feel it trying to leave the ground. You pull back gently on the stick. The ground suddenly disappears beneath you. You are flying!

You have been told to go as fast as eighty-five miles an hour, although the plane has a maximum speed of twice that. You reach an altitude of five hundred feet and ease back on the throttle, watching your air speed steadily. If it drops below fifty-five miles an hour, the airplane will stall. To increase speed, you push the stick forward, drooping the nose slightly.

Already, it is time to make the first turn. You shift the stick gently to the left, and the wing on that side drops, causing the plane to make a turn. You have learned to call it. There are so many things to check that you hardly notice the view. After making three more turns (four, you are now on your final approach), you start to slow down, and you’re almost on the runway.

The control tower tells you to land. You reduce the amount that the throttle is open and ease the plane dropping. Not too fast. Not too steep or gentle. Come in too high and you’ll overshoot the runway, come in too low, and you’ll fall short. You brace yourself as the plane comes roaring toward you.

When the plane is just inches off the ground, you close the throttle and pull back on the stick to raise the nose. Without power from the engine, the wings no longer support the plane, and it drops. You don’t want to be too high when this happens or the plane will bounce as it makes contact with the ground. But you make a perfect landing. An attendant feeling around you as you roll down the runway and come to a stop. Flying is fun!

Answer each of the following questions in the form of a sentence. (If a question does not contain a vocabulary word from this lesson, use a new one.) Some word-only answers are included in the answers as part of the word. (8)

1. What begins your flight before leaving the ground?
2. What is the maximum speed allowed on the flight?
3. What is the meaning of stall as it is used in the passage?
4. What might happen if the check of the controls before a flight is less than meticulous?
5. How does the pilot receive instructions when in the plane?
6. What is the meaning of confidence as it is used in the passage?
7. How does the pilot try to hide a feeling of nervousness before the flight?
8. How is it made clear that the pilot didn’t hurry away to the plane?
9. What does the pilot need before proceeding to take off?
10. How much time is usually necessary before one is allowed to fly alone?
The Wordly Wise 3000 lessons work sequentially, with each exercise requiring more precise knowledge of the vocabulary words than the previous exercise. This systematic approach to vocabulary instruction enables students to actively participate in the process of their own word learning by thinking about the various meanings of each word and applying what they know.

A boxed feature called Fun & Fascinating Facts appears at the end of each lesson. This feature provides explanations or short stories about word origins and word families. Telling stories about words conveys a sense of fun about language and encourages students to become interested in learning words in general.

Every fourth lesson is followed by a crossword puzzle or hidden message puzzle that incorporates the words from the previous four lessons, giving students a playful way to revisit the words they now know as their own.
How, When, and Where to Use Wordly Wise 3000

Wordly Wise 3000 (Books 2–12) are designed for maximum flexibility. The lessons included in the books can be used in different settings (in class, at home, in one-on-one tutoring sessions), at different frequencies (once a week, three times a week, every day), and in varied sequences (lessons can be followed in numerical order or used individually). Teachers who use these books with their students have told us they use them in several different ways:

- as in-class activities
- as homework
- as independent study
- as preparation for standardized tests or spelling bees

We recognize that many teachers have students with different reading levels in their classrooms. The Wordly Wise 3000 series can help a teacher accommodate these differences. By choosing the appropriate level of the Wordly Wise 3000 books for particular students, teachers can ensure that their advanced students stay challenged and their struggling students have material that suits their learning level.

Our research shows that about half of the teachers working with Wordly Wise 3000 teach vocabulary two or three times per week. About a third teach vocabulary almost every day, and ten percent teach vocabulary once a week. (Percentages do not add up to 100 because some teachers did not answer this question in our survey or chose “other.”) The Wordly Wise 3000 series can accommodate any of these individual schedules. Here are some typical plans.

Once-a-Week Teaching Plan

If you are able to devote only one class per week to vocabulary, it is best to use that time to help students become familiar enough with the new words that they can complete the exercises outside of class on their own. Such a teaching plan might look like this:

Vocabulary Day

As a class, go over the word list thoroughly. Have students read the definitions and sample sentences aloud. Ask students to use the new words in sentences of their own. Use queries, illustrations, pantomimes, and graphic organizers (described in Part 2 of this Guide, pages 19–23) to encourage discussion of what a word means and how it differs from related words. Make a Word Wizard chart (see Part 2, page 15) that contains all the week's
vocabulary words and display it in the classroom. Ask students to be on the lookout for the words outside the classroom. When they encounter one of them, they can add their names to the chart with their examples of how each word was used. Assign all or a selection of the exercises in the lesson as homework for the following week.

Three-Days-a-Week Teaching Plan

Teachers who can devote three days a week to vocabulary instruction should be able to complete one lesson each week, with students doing most of the exercises in the student book and some of the activities and enrichments suggested in the Teacher’s Guide. Such a teaching plan might look like this:

Day 1
Introduce the word list to the class and facilitate discussion about each item. Complete the Finding Meanings exercise as a group. Assign the Just the Right Word and Applying Meanings exercises as homework to be ready by the next vocabulary class day.

Day 2
Refresh the students’ memories about the words in the lesson by asking volunteers to briefly define each one. Review the homework as a group, having students explain why one answer is correct and the others wrong. Have a student or students read the Passage aloud. Assign the Word Study and Passage questions as homework to be ready by the next Wordly Wise 3000 class day.

Day 3
Review the homework as a group, again having the class discuss what makes the correct answer correct. Reinforce the students’ new knowledge by having them pick five words from the list to use in a short story or essay on any topic.

Five-Days-a-Week Teaching Plan

Teachers who teach vocabulary every day should be able to complete one lesson each week, with students doing all the exercises in the student book and many of the activities and enrichments suggested in the Teacher’s Guide. Such a teaching plan might look like this:

Day 1
Introduce the word list to the class and facilitate discussion about each item. Use queries, illustrations, pantomimes, and graphic organizers (described in Part 2 of this Guide, pp. 19–23) to encourage discussion of what a word means and what it doesn’t mean. Assign the Finding Meanings exercise as homework to be ready by the next class day.
Day 2
Review the homework as a group, having students explain why one answer is correct and the others wrong. Have the students complete the Just the Right Word exercise in small groups, then discuss the answers as a class.

Day 3
Complete the Applying Meanings and Word Study exercises by calling on students to answer questions one at a time. Query the class to gauge their understanding, and solicit explanations from other class members to clarify meanings.

Day 4
Have the students read the Passage and answer the questions that follow on their own. Discuss the answers as a class.

Day 5
Have the students demonstrate their mastery of the new words by paraphrasing—rewriting definitions for the words, using the words in their own sentences or stories, or both.

A Final Word: How Instruction Can Help Students Who Start with Smaller Vocabularies

Students come to school with vastly different vocabularies. Some will know thousands more word meanings than other students in your class. This occurs in part because of the differences in the number of new words students are exposed to in their homes and communities. Students who come from homes where spoken and written vocabularies are limited will know fewer words than students who come from homes where exposure to a wide range of vocabulary is common. Arriving in class with a small vocabulary does not predict failure—it only highlights the need for direct vocabulary instruction in the schools. As one researcher put it:

If we are serious about “increasing standards” and bringing a greater proportion of schoolchildren to high levels of academic accomplishment, we cannot continue to leave vocabulary development to parents, chance, and highly motivated reading.¹⁰

Studies have shown that the key to increasing vocabulary is exposure to new words, not an innate ability to learn from context.¹¹ Experts emphasize that vocabulary development is an attainable goal. If given the opportunity to learn new words as well as effective instruction, most students can acquire vocabulary at rates that will improve their comprehension. This enables them to read increasingly challenging texts with fluency and improves their chances for success in school and afterward.
Other Aspects of Good Vocabulary Development

Effective vocabulary development is a multifaceted process requiring a combination of direct instruction, discussion, and active encouragement of independent learning strategies. On their own and in the classroom, students draw on a variety of methods to learn the thousands of words they acquire each year. This part of the Guide will discuss the following general strategies and specific techniques to keep in mind as you teach vocabulary:

- encouraging wide reading
- emphasizing learning from context
- using prefixes, suffixes, and roots
- using graphic organizers such as semantic maps, concept of definition maps, semantic feature analysis, and Venn diagrams
- extending instruction through reading aloud and discussion

These approaches will enhance your vocabulary curriculum and can be used to supplement the direct instruction that Wordly Wise 3000 provides.

Volumes of Volumes: Encouraging Wide Reading

Getting your students to read more may be the most valuable thing you can do to improve their vocabulary. Although direct instruction plays a crucial part in vocabulary growth, most of the words your students learn will be acquired through incidental learning, as they read on their own. The average student learns about 3,000 words a year. Although direct instruction plays a crucial part in vocabulary growth, evidence shows that wide reading is the main avenue for student word acquisition. Researchers present this scenario to demonstrate the effectiveness of wide reading:12
If, over a school year, a fifth-grader reads for an hour each day, five days a week, in and out of school at a conservative rate of 150 words per minute, the student will encounter 2,250,000 words in the course of reading.

If 2 to 5 percent of the words the student encounters are unknown words, he or she will encounter from 45,000 to 112,500 new words.

We know that students learn between 5 and 10 percent of previously unknown words from a single reading. Using the lower number given above for unknown words encountered during the reading program, we see that a student would learn at least 2,250 new words from context each year.

This estimate suggests that incidental learning is critical to vocabulary development. Again, the more students read, the more word meanings they will know and the more likely they will be to read with both pleasure and comprehension.

To be truly beneficial, wide reading should include texts with varied levels of difficulty. Students reading at or below their current levels will not dramatically increase their vocabulary. And as you know, when students read texts that consist primarily of unknown words, they usually become frustrated. To help them get the most out of incidental learning, you should have them read some books for fun and others for a challenge.

Motivating students to read can be a difficult task. Here are a few suggestions for making reading appealing to students at all ability levels:

- Devote some class time to independent silent reading. This time may be particularly helpful for students who have never done extensive reading for pleasure. Reading for a length of time in class will enable students to do this on their own outside of class.

- Make a variety of books available in class and recommend books for students to find in the library and to read outside of class. You might want to provide lists of books students might like to read.

- Promote social interactions related to reading. Setting a time for regular discussion of books students have read will motivate them to read more and help them understand their reading better. (See page 23 in the final section of Part 2 for more about the importance of discussion.)

- Model the importance you place on reading by telling students about books you are reading. When students have silent reading time, read a book of your own to show that reading is a valuable activity that you enjoy, too.

These strategies will have long-term benefits for your students. Wide reading is a key component to vocabulary development, but as with much important
learning, its effects are cumulative rather than immediate. The next sections will discuss what you can do to help students get the most out of reading actively and efficiently.

Getting a Clue: Emphasizing Learning from Context

Most of the words acquired through incidental reading are learned through context. Students learn from context by making connections between the new word and the text in which it appears. As noted in Part 1 of this Guide, students learn words through repeated exposures, gaining more comprehension of a word's meanings and functions by seeing it several times in different contexts.

Experts debate the effectiveness of teaching students how to use context clues. While some studies show that teaching students how to identify and use context clues is an effective technique for increasing vocabulary, other research suggests that learning words from context is an innate skill that all readers use. Kuhn and Stahl have found that children of all abilities learn at the same rate from context; that is, advanced readers are no more efficient at learning from context than less advanced readers—the advanced readers simply read more. All experts, however, stress that it is crucial to make students aware of the importance of using context clues as an essential tool in word acquisition.

Here are some techniques for enhancing students' awareness of the importance of context clues:

- Model basic strategies for using context clues, when working with Wordly Wise 3000 or reading other texts.
- Provide explanations of how, when, and why to use context to figure out word meanings.
- Provide guided practice in using context.
- Remind students to apply the skill when reading.

You can also use activities such as the Word Wizard chart (developed by Beck, et al.) to make students aware of learning words in context. As you discuss unfamiliar words in class, you can add them to the chart. If a student comes across the word again when reading and notes its context, his or her name goes up on the chart. You can provide students with periodic rewards for being Word Wizards (that is, contributing many words to the chart).

Another way to emphasize the importance of learning from context is to have students rate their knowledge of a new word by using a checklist, as shown on page 16:
### Knowledge Rating Checklist

*How much do I know about these words?*

<table>
<thead>
<tr>
<th>Word</th>
<th>Can define</th>
<th>Have seen/heard</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td>access</td>
<td></td>
<td>✓</td>

<td>✓</td>
<td></td>
</tr>
<tr>
<td>wilderness</td>
<td>✓</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

These checklists can also be used in group activities in class. You may also want to have students keep these checklists together in a notebook along with a running list of words they come across that intrigue or interest them. Encouraging a general awareness of words as fun and interesting in themselves will help students pursue their own vocabulary development.

Using context is an important skill that students will employ frequently. However, in learning when to use context clues, students also need to know when *not* to use this strategy. Since many texts do not signal the meanings of words explicitly, using context is not always the best way to derive the meanings of new words. The next two sections will discuss how to teach other strategies for increasing word knowledge.

### Part Smart: Using Prefixes, Suffixes, and Roots

Experts have noted that the upper elementary grades are a good time to start teaching students how to use word parts to figure out the meanings of words. Information from prefixes, suffixes, and roots can help students learn and remember words; using word parts can be a particularly useful strategy in reading content-area texts. For example, science texts will often include words that use the same word parts repeatedly, such as *bio-* in *biosphere*, *biology*, *biodegradable*, *bioluminescence*, and *biochemical*. Knowing that “bio” means “life” can help students recognize these words in context and add to their comprehension of these words. This particular root will also help students learn words across content areas. For example, in language arts students will encounter words such as *biography*. 
You can begin to teach word-part strategy by telling students that words can be composed of affixes—prefixes and suffixes—and roots. Learning to break words into affixes and roots will make some long words more manageable for students who may be intimidated by the length of words such as *interdependent*. Modeling how to break words into parts may be necessary. To do this, you can teach students to cover prefixes such as *inter-* in the word *interdependent*, and see if they recognize the rest of the word. Then you can have them cover the suffix *-ent*, leaving *depend*.

Further modeling and practice with adding and removing prefixes and suffixes such as *un-* and *-able* will give students facility with breaking words down into parts.

In teaching word parts, you should stress how the parts function to affect word meaning. You may want to point out that prefixes such as *un-*-, *super-*-, *anti-*-, *mis-*-, and *sub-* change the meanings of the roots they precede in predictable ways. Since prefixes are consistently defined, you may want to supply definitions of the prefixes given in the table below.

Suffixes have less stable meanings, so merely learning their abstract definitions can be confusing. But learning to recognize common suffixes such as -tion, -less, -ed, and -ing will help students know a word’s function. For example, remembering that -tion indicates the word is a noun and that -ed usually forms the past tense of verbs can make it easier for readers to figure out words using these suffixes. Providing plenty of examples of suffixed words is probably more useful than memorizing the definitions of suffixes.19

Once students have grasped the concepts of prefixes, suffixes, and roots, you can easily teach them specific word parts. Only 20 prefixes make up 97 percent of the prefixed words in printed school English. Sixty-five percent of suffixed words end in -s, -es, -ed, or -ing.20 The table on page 17 shows a list of the most commonly used prefixes and suffixes in printed school English. Teaching your students to use just a few of these affixes can dramatically improve their vocabulary development. One study found that third graders who were taught the first nine prefixes in the chart and how to break down words into roots and suffixes outperformed a control group tested in measures of word meaning.21

Many lists containing hundreds of Greek and Latin roots are available, but teaching the meanings of roots may not be as useful to your students as teaching the affixes. Some researchers have pointed out that the current meanings of many words do not resemble their historical roots. Trying to apply the ancient meanings of roots to figure out the meanings of words used today is difficult but often worth doing.

Telling students about the roots of words they are learning can help make those words more memorable by adding a story to what they know. For example, the following account of the origin of puny from the Fun & Fascinating Facts feature in Lesson 3 reinforces the word’s meaning:

The Latin phrase pūnīs ne means “born afterward” and was applied to Roman children of noble birth who followed the firstborn. Since Roman titles and property passed to the oldest, the other children, those who were pūnīs ne, were considered to be less powerful. The phrase passed into English as our adjective puny.

In content areas such as science, it may be useful to have students memorize roots that recur. Using word webs like the one on page 19 can reinforce the relations among words incorporating these roots.
The strategy of using word parts is probably most effective when combined with other ways of acquiring words, such as context clues. Knowing how to break down words into parts will make them easier to tackle; learning prefixes, suffixes, and some roots will give students more tools for vocabulary growth.

I See What You Mean: Using Graphic Organizers

Encouraging wide reading, using context, and employing word parts are excellent long-term strategies for vocabulary development. This section provides some additional activities that can deepen your students' word knowledge and expand your direct instruction of vocabulary.

Concept of Definition Maps

Concept of definition maps such as the one on page 20 are graphic organizers that show the elements of a typical dictionary definition, including:
• The category to which the word belongs, labeled, "What is this?"
• Characteristics of the word, labeled, "What is it like?"
• Examples and non-examples of the word.  

Students fill in the maps by referring to context, using their prior knowledge, and consulting dictionaries. The following map elucidates the meaning of carnivore, which appears in Lesson 3:

After having the class complete the map, you may want to model how to write a definition using the information in the map. For example, you could say: "A carnivore is a mammal that eats flesh. A carnivore has fangs and consumes other animals. It may sometimes eat food that is not meat. Dogs, cats, and bears are some types of carnivores." You can also have students write their own definitions and then confirm them by looking the word up in the dictionary. They may revise their definitions after looking them up.
Semantic Maps

Semantic maps can be used to develop students' understanding of a particular concept or group of thematically related words. For example, in teaching an essay about dinosaurs, you might target the following vocabulary words: *ancestor*, *carnivore*, *gigantic*, *extinct*, and *ferocious*. Then, you may begin instruction by having students brainstorm words that are related to the concept of dinosaurs. As they brainstorm, you list their words on the board, making sure to include the words you have targeted for them to learn.

Discussion is key to semantic mapping. During the brainstorming session, have students discuss and define all of the words on the list. Help students refine their understanding of the words by asking them to group related words together to create a semantic map such as this one:

![Semantic Map Diagram](image)

The target words are highlighted, and sections are left blank so that the class can fill in another category after reading the selection. Semantic mapping is a good technique to use in content-area teaching, in which vocabulary words will be thematically related. The technique works best as a group activity, since discussion will help students with smaller vocabularies learn all the words that are talked about. Advanced learners will benefit from the extra exposure to words they have learned.
Semantic Feature Analysis

Another good technique to use in teaching words that share content is semantic feature analysis, which makes use of a grid, such as the one below. The left-hand column contains the names of members of the category. For a unit on living creatures, you might write words such as: dog, cat, hamster, buffalo, tiger, sparrow, and horse. The top row of the grid lists features of the category's members such as: has fur, has feathers, can fly, can be a pet, and runs on four legs. Students should be encouraged to add terms to either the column or the row during discussion.

<table>
<thead>
<tr>
<th></th>
<th>has fur</th>
<th>has feathers</th>
<th>can fly</th>
<th>can be a pet</th>
<th>runs on four legs</th>
</tr>
</thead>
<tbody>
<tr>
<td>dog</td>
<td>+</td>
<td>-</td>
<td>-</td>
<td>+</td>
<td>+</td>
</tr>
<tr>
<td>cat</td>
<td>+</td>
<td>-</td>
<td>-</td>
<td>+</td>
<td>+</td>
</tr>
<tr>
<td>hamster</td>
<td>+</td>
<td>-</td>
<td>-</td>
<td>+</td>
<td>+</td>
</tr>
<tr>
<td>buffalo</td>
<td>?</td>
<td>-</td>
<td>-</td>
<td>-</td>
<td>+</td>
</tr>
<tr>
<td>tiger</td>
<td>+</td>
<td>-</td>
<td>-</td>
<td>-</td>
<td>+</td>
</tr>
<tr>
<td>sparrow</td>
<td>-</td>
<td>+</td>
<td>+</td>
<td>-</td>
<td>-</td>
</tr>
<tr>
<td>horse</td>
<td>?</td>
<td>-</td>
<td>-</td>
<td>?</td>
<td>+</td>
</tr>
</tbody>
</table>

After seeing the grid, groups of students or the whole class discusses whether the items in the column are an example of the features across the top, marking + for positive examples, – for negative examples, and ? for words that might be examples.

As with semantic maps, discussion is key to clarifying the meanings of words in this activity. It is also an excellent technique to use in content areas such as social studies and science.

Comparing and Contrasting: Venn Diagrams

Venn diagrams are another good graphic organizer to use, especially when teaching students to compare and contrast related concepts such as trip and sojourn, virus and bacteria, nation and country, and poetry and prose. The following diagram helps to clarify the similarities and differences between two related ideas:
Venn Diagram

Poetry
- sometimes metered or rhymed
- often short
- includes verse, spoken word, epics

Prose
- written language
- literature for enjoyment or purpose
- includes articles, essays, memoirs, stories, and novels

Using graphic organizers will provide your students with more exposures to words they are acquiring and will help them solidify the knowledge they’ve gained. The final section will discuss how oral language can be used to enhance your vocabulary instruction even further.

Let’s Talk: Extending Instruction through Reading Aloud and Discussion

Reading literature to students exposes them to rich language, sometimes referred to as “book language,” that they usually do not hear in everyday speech. Reading nonfiction materials aloud to students exposes them to domain words—that is, words associated with a particular content area—that they need to be successful in school. The Wordly Wise 3000 series provides a rich array of both types of words at all levels.

Reading aloud is a common practice in the lower grades; in fact, reading aloud, in conjunction with using picture cues, forms the basis for Wordly Wise 3000 Books K–1. Although research states that reading volume, rather than oral language, is the prime contributor to differences in students’ vocabularies past the fourth grade, additional research indicates that sixth graders learned about as many words from a single listening as they would from a single reading. Therefore, reading aloud can be a beneficial strategy to use even with older students, especially struggling readers, English language learners, and those who have smaller vocabularies.
Discussion can greatly enhance any vocabulary instruction. Students with small vocabularies benefit from the knowledge contributed by their classmates, and misunderstandings of words can be cleared up publicly. In addition, as students wait to be called on, they often practice responses silently. As a result, discussion reinforces vocabulary development. Discussions can be made more fun by having students act out or pantomime words or engage in debates about word meanings.

Since vocabulary growth is such a long process, drawing on a variety of approaches will help prevent boredom. Some words will require much more detailed instruction than others; certain activities such as semantic maps work best with words that are related in meaning. As you experiment with the strategies and techniques just described, you will be able to determine which ones will best help your students. The last part of this Guide will demonstrate how you can use some of these approaches as you teach Wordly Wise 3000 lessons.
Part 3

Sample Lesson

This part of the Guide provides instruction and modeling of how to teach a sample lesson in Book 5. These instructions will help you introduce the basic concepts and approaches used in the lessons and will also help you extend the lessons, using the strategies and techniques discussed in Part 2. These approaches will work no matter what level you are teaching. If you have not taught a Wordly Wise 3000 lesson before, the following sample lesson instructions will give you an understanding of the format and purpose of all Wordly Wise 3000 lessons.

Lesson 4

Word List

Begin by having students look at the word list for the lesson. Tell them that each lesson in Wordly Wise 3000, Book 5 opens with a list of 15 words that they will discuss and learn, and that the word list will be followed by several exercises.

Tell students that each word list provides definitions of the words as well as examples of how the words are used in sentences. You may want to discuss the word list as a class. Point out that each word’s pronunciation is given beneath it and that each definition includes the word’s part of speech. Tell them that often a word will take more than one form, as in the fifth word, despair, which is defined as both a verb and a noun. Also tell them that the words will often have more than one meaning, such as the third word, course.

n. 1. The path over which something moves.
The spaceship is now on a course for Mars.
2. A way of acting or behaving.
Because it is raining so hard, our best course is to wait in the car until the storm ends.
3. A subject or set of subjects to be studied.
The high school science course includes several field trips.
Read aloud each definition and sentence for *course* and have students ask questions about the meanings. You may want to point out that the example sentences usually contain context clues to the meanings of the words. For example, for the third meaning of *course*, the phrase “high school science” provides a clue to what *course* means. Remind students that context clues can help them understand a word’s meaning. You may want to go through all the words in the word list in a similar manner, reading the definitions and sentences aloud and having students discuss the words. In subsequent lessons, you can have students study the words on their own.

To reinforce the meanings of some words such as *sever, despair, or jubilation*, you may want to illustrate them on the board or pantomime the actions. Note that sometimes several versions of a word will be given in boldface type, as with *accurate* and *accuracy*.

You can extend the introduction of some words by using a concept of definition map. To use this technique with *gale*, draw a blank map on the board as shown below:

---

**Concept of Definition Map**

```
What is this?

Examples

Non-examples

What is it like?
```

---
Have students read the definition of *gale*, and then as a class, have them answer the questions in each box. You may want to instruct students to consult the dictionary to supplement their knowledge of the word. Write their answers in the boxes, as shown below:

**Concept of Definition Map**

- **What is this?**
  - a very strong wind

- **Examples**
  - windstorm, strong gust

- **Non-examples**
  - breeze, stillness, gentle wind

- **What is it like?**
  - a strong current of air, blows at 32 to 63 miles per hour

Then, model how to write a complete definition of the word, using the map. For example, you could say: “A *gale* is a very strong wind. Its gusts blow at 32 to 63 miles per hour.” This map reinforces word meanings and can be used to provide students with extra practice with a word at any point in a lesson.

### 4A Finding Meanings

In the first exercise, students draw on their knowledge of the words’ definitions to form sentences. Tell students that they should pick two of the four phrases to form a sentence that makes sense. Remind them that they can use the definitions of the words on the previous pages to answer these items.

For item 1, you can model the exercise by telling students to begin by looking at the four options: a, b, c, and d. Ask them, “Which two options
can begin a sentence?" Say that since b and c begin with capital letters and can start the sentence, they should try combining these two options with the remaining ones to see if they make sense. You can write the following sentences on the board:

- To deteriorate is to get worse.
- To deteriorate is to feel slightly uneasy.
- To revive is to get worse.
- To revive is to feel slightly uneasy.

Have students discuss the sentences and choose the correct answer ("To deteriorate is to get worse."). As a class, have students complete the rest of the items in 4A, and answer any questions students have about the exercise.

4B Just the Right Word

In the second exercise, Just the Right Word, students replace definitions of the words as they appear in sentences with the correct vocabulary words. Tell students that the word list is repeated in the box on this page. They should review it to familiarize themselves with the possible choices.

Read the instructions aloud and write the first sentence on the board. Read this sentence aloud and ask students what word from the list replaces or is a synonym for "loud outbursts." Cross out this phrase and write gales above it. You may want to repeat these steps with several items and then have students complete the rest of the exercise on their own.

You can extend this activity by having students come up with antonyms for some of the words, after they have completed the exercise. Not all words have antonyms, of course, but thinking about antonyms requires students to consider crucial aspects of a word. In this exercise, you might have students identify the antonyms for accurate, depart, and despair. Possible antonyms include: incorrect, arrive, joy.

4C Applying Meanings

In Applying Meanings, students choose correct answers to questions involving the vocabulary words. This exercise requires students to use their knowledge of each word's meaning and apply it in new contexts.

Read the instructions aloud and remind students that they can circle more than one answer. Then have a volunteer read the first question and the possible answers. Have the class discuss whether or not and why each answer might be correct. Although a and b, modes of transportation, are most commonly associated with departures, you can discuss how a guest can also depart. Then talk about how a noise may stop but does not depart.
Discussion will help students clarify the subtle meanings of the vocabulary words and will make this exercise more lively. To get the most out of discussion, it's a good idea to call on many different students, so that the majority of the class will be silently preparing answers. You may wish to extend discussion throughout the exercise or have students complete the exercise on their own.

4D Word Study

The fourth exercise provides students with more sophisticated word study. The Word Study activity alternates among several types of exercises: synonyms and antonyms, prefixes and suffixes, Latin and Greek word roots, and homophones.

Exercise 4D in Book 5 covers both synonyms and antonyms. Read the instructions aloud. Have a student define *synonym* and *antonym*. Then read aloud the first set of words. Ask the class which items are either synonymous or opposite in meaning. Use discussion to clarify the meanings of the words and the correct answer. Remind students to circle the words *deteriorate* and *improve*, and to write *A* in the correct space. Repeat this step with several items and then have students complete the exercise on their own. You can follow a similar pattern with the other Word Study exercises in this book.

4E Passage

In the final section, Passage, students read an original passage that incorporates the vocabulary words. By this point, students have become well acquainted with the meanings of the words, so that the reading in context is in effect “debugged” for them. Most of the passages are nonfiction and cover the content areas of science, math, and social studies.

The vocabulary words are integral to the understanding of the text, and thus contribute to students’ understanding of the passage. The ultimate goal of *Wordly Wise 3000* is to have students develop vocabulary so that they can read with greater fluency.

After reading the passage, students answer questions about it. Students must use complete sentences to answer the questions, and more subtle knowledge of how a word adapts to its context is required to answer some of these questions.

Depending on your students’ needs, you may want to read the passage aloud. Then read the instructions that follow the passage and clarify any questions students have about the exercise. Have the class work together to answer the first three items. Remind students that sometimes, as in question 1, they must use a vocabulary word in their answer, since none is used in the question. Have students complete the remaining exercises on their own or in small groups.
In *Wordly Wise 3000*, Second Edition, an alternative exercise has been provided. It can be found in this Teacher’s Resource Book, beginning on page 43. While it is titled “Lesson Review Exercise,” this cloze exercise can be used as a less challenging follow-up to the Passage, as a lesson extension (see below), or for review or assessment. Read the directions with students, and walk them through the first item, discussing their answers.

**Extending the Lesson**

To extend this final exercise and the lesson as a whole, you may wish to use the Lesson Review Exercise discussed above. You may also encourage students to write short passages using words from the list.

After students have completed all the exercises, point out the Fun & Fascinating Facts feature, which provides explanations or short stories about word origins and word families. Explain that English words are often derived from Latin, Greek, and other roots, which can sometimes help students figure out word meanings. Volunteers may read the feature aloud.

Tell students that every fourth lesson is followed by a crossword or hidden message puzzle that uses the words from the previous four lessons.

You will know best how much modeling and guidance your students will need to complete each lesson. You can also use the preceding instructions to teach students how to do most of the lessons in Book 5.

**Testing and Assessment**

When your students have completed a lesson in *Wordly Wise 3000* (2–12), assess their understanding by administering the corresponding Lesson Test. These reproducible tests, found in this Teacher’s Resource Book beginning on page 69, test every word in all the forms and meanings presented in *Wordly Wise 3000*. In addition, a cumulative Midterm (following Lesson 10) and a Final Test (following Lesson 20) each provide a new passage using a selection of the words from the previous lessons. The new passages help ensure that students can apply the word meanings they have learned in a different context. An Answer Key for the Lesson, Midterm, and Final Tests can be found on page 206.

As an alternative, you may wish to use the *Wordly Wise 3000* Test Generator, available separately. The Test Generator allows you to customize your assessment by choosing only those words you wish to test, as well as providing you the opportunity to test words from a group of lessons of your own choosing. The Test Generator also allows you to construct alternative forms of a test to preserve test security and/or for test–retest purposes. You may also prepare pre- and post-tests as a basis for differentiating instruction and as a means of documenting learning gains for individual students or for the whole class.

Bibliography

Student Book Answer Key
Lesson 1

1A Finding Meanings p. 2
1. c—a 5. d—c 8. b—d
2. b—a 6. a—d 9. a—d
3. b—c 7. d—a 10. c—a
4. d—c

1B Just the Right Word p. 3
1. obedient
2. retire
3. budge
4. compatible
5. alert
6. obstacles
7. distraction
8. assigned
9. pedestrians
10. patient

1C Applying Meanings p. 4
1. a, b, c 5. a, b, c, d
2. a
3. a, b, d
4. a, b, d

1D Word Study p. 5
1. budge—shift
2. retire—quit
3. barrier—obstacle
4. warning—alert
5. jostle—shove
6. alert—drowsy
7. slight—burly
8. unfamiliar—acustomed
9. obedient—defiant
10. retire—arise

1E Passage p. 6 (The appropriate vocabulary word is printed in boldface. Sentences are examples; students’ sentences may vary.)
1. The idea was that dogs could be trained to be the eyes for blind people.
2. It begins when the dog is assigned to its new owner.
3. Such a person might be comfortable with a large, powerful dog.
4. They probably would not be very compatible.
5. People who are walking are usually on sidewalks.
6. Guide dogs are taught to disobey commands that would put their owners in danger.
7. This is done to accustom it to anything that might happen.
8. Alert means "watching out for signs of danger."
9. The dog will not budge until it is safe to do so.
10. They are trained to ignore distractions.
11. Patient means "willing to wait without complaining."
12. Garbage cans, mailboxes, and lampposts are some things that might be in the way.
13. They must make sure their owners don't get jostled.
14. Retires means "to end one's working life."
15. They are very close companions.

Lesson 2

2A Finding Meanings p. 10
1. a—b 5. b—d 8. c—a
2. d—b 6. c—b 9. d—a
3. c—d 7. c—b 10. b—d
4. a—c

2B Just the Right Word p. 11
1. beverages
2. extracts
3. exported
4. Introduced
5. combination
6. cultivated
7. tropical
8. purchased
9. craved
10. cluster

2C Applying Meanings p. 11
1. a, c 5. a, c
2. c
3. a, b, c
4. b, b

2D Word Study p. 12
1. immature
2. unacustomed
3. incomplete
4. incompatible
5. irresistible
6. disobedient
7. impatient
8. undismayed
9. insufficient
10. dislike
11. dishonest
12. uneasy

2E Passage p. 14 (The appropriate vocabulary word is printed in boldface. Sentences are examples; students’ sentences may vary.)
1. Eating some chocolate would satisfy a strong desire for it.
2. Cocoa is used to make chocolate candy and beverages.
3. Cultivated means “grown.”
4. They cannot grow where it is cold and dry.
5. They are sent to countries all over the world.
6. They used them to purchase the things they needed.
7. Candy is made by combining cocoa powder with cocoa butter, sugar, and dried milk.
8. You would find a cluster of 20 to 40 cocoa beans.
9. The beans have a slight chocolate aroma.
10. Consumed means “drank.”
11. After the beans are roasted, the shells become brittle and are easy to remove.
12. The cocoa butter is extracted from it.
13. Spanish explorers introduced chocolate to Europe in the 1500s.
14. Bland means “lacking a strong flavor.”
15. They were equivalent in value for the Aztecs.

Lesson 3

3A Finding Meanings p. 17
1. b—a 5. c—d 8. d—a
2. c—a 6. d—b 9. c—d
3. b—c 7. d—a 10. c—b
4. b—c

3B Just the Right Word p. 18
1. obscured
2. puny
3. evident
4. ferocity
5. preyed
6. premature
7. survivors
8. option
9. duration
10. carnivores

3C Applying Meanings p. 19
1. c, d 5. a
2. a, b, c
3. a, b, c, d
4. c

3D Word Study p. 20
1. mature: fully grown
2. vivere: to live
3. carnis: meat
4. ferox: fierce
5. pedester: on foot
6. cultus: till
7. trahere: draw
8. prehendere: grasp
9. durare: to last
10. videre: to see

3E Passage p. 22 (The appropriate vocabulary word is printed in boldface. Sentences are examples; students’ sentences may vary.)
1. They found its remains preserved in rock in Utah.
2. It lasted over a hundred and fifty million years.
3. They became extinct about 65 million years ago.
4. They understand how it looked and how it attacked other creatures.
5. Prey means "an animal that is hunted for food."
6. Tyrannosaurus rex was gigantic.
7. Survive means "to stay alive."
8. There weren’t really any possibilities for escape, once Utahraptor attacked.
9. No. They were puny in comparison.
10. Scientists are still studying this subject.
11. It seems evident that it happened suddenly.
12. The dust from the meteorite would obscure the sun’s rays.
13. The bones of a flying dinosaur have been discovered, leading some scientists to believe that it may be related to today’s birds.
14. They were both carnivores.
15. It was a ferocious creature.
Lesson 4

4A Finding Meanings p. 25
1. b—a 5. d—b 8. d—c
2. a—d 6. b—a 9. b—c
3. c—a 7. c—b 10. a—d
4. b—d

4B Just the Right Word p. 26
1. galas
2. navigating
3. destination
4. depart
5. voyage
6. horizon
7. approximate
8. course
9. severed
10. jubilant

4C Applying Meanings p. 27
1. a, b, c 5. a, b
2. a, c, d 6. a, c, d
3. a, d 7. a, b, c, d
4. a, b, c 8. a, b, d

4D Word Study p. 28
1. deteriorate, improve A
2. jubilation, joy S
3. obvious, evident S
4. depart, arrive A
5. puny, burlly A
6. correct, accurate S
7. comprehend, understand S
8. preserve, save S
9. separate, combine A
10. jubilation, despair A

Lesson 5

5A Finding Meanings p. 35
1. d—b 5. a—c 8. b—c
2. c—d 6. a—b 9. d—b
3. a—d 7. c—a 10. d—b
4. d—a

5B Just the Right Word p. 36
1. foolhardy
2. lure
3. summit
4. blizzard
5. route
6. conquest
7. crevice
8. challenge
9. optimism
10. makeshift

5C Applying Meanings p. 37
1. a, d 5. b, d
2. a, b, c, d 6. b, c, d
3. a, c 7. a
4. a, b, d 8. a, c

5D Word Study p. 38
1. assignment
2. distraction
3. combination
4. craving
5. survivor
6. optimistic
7. horizontal
8. nostalgic
9. ferocious
10. carnivorous
11. accuracy
12. jubilation
13. navigation
14. obedience
15. patience

Lesson 6

6A Finding Meanings p. 43
1. d—a 5. d—a 8. b—a
2. d—c 6. c—a 9. b—c
3. d—b 7. a—c 10. a—d
4. b—c

6B Just the Right Word p. 44
1. monstrous
2. roused
3. agony
4. abolished
5. harbors
6. characters
7. grin
8. escalated
9. catapulted
10. inflicted

6C Applying Meanings p. 45
1. b, c, d 5. c
2. a, c, d 6. a, b, c
3. a, c, d 7. a, c
4. b, c 8. a, b, c

6D Word Study p. 46
1. defeat
2. cut
3. unclear
4. remove
5. correct
6. loyal
7. hatred
8. stern
9. short
10. weak

6E Passage p. 47 (The appropriate vocabulary word is printed in boldface. Sentences are examples; students’ sentences may vary.)
1. Many Americans supported slavery, but a great many others loathed it.
2. The quarrel escalated into a war.
3. President Lincoln abolished slavery in the United States.
4. Her novel Uncle Tom’s Cabin catapulted her to world fame.
5. Answers will vary. The plan to sell Eliza’s child and the beating of Uncle Tom, which caused his death, were both terribly cruel acts.

Lesson Review Exercises
Lesson 1

1. Until a hundred years ago, blind people had difficulty getting around. It was at that time that someone first thought of the __________ of guide dogs.

2. Dogs naturally like to be active and on the move. Seeing Eye dogs learn __________ by being made to sit without moving for long periods.

3. Seeing Eye dogs must keep their minds on the job they have to do. Loud noises and interesting smells are two of the __________ they are taught to ignore.

4. Many dogs will snap back if someone accidentally bumps into them. Guide dogs are trained not to respond even if someone __________ them quite hard.

5. Seeing Eye dogs and their owners enjoy each other’s company. They are __________ for each other and are hardly ever separated.

6. It takes a month of getting to know one another for each dog and its future owner. At the end of that time, the dog is __________ to its new owner.

7. Each dog is carefully matched with its new owner. A small person would not receive a large dog, which might be more suitable for a __________ person.

8. There are many things to be considered in matching dog to owner. The most important is whether the dog and its new owner are __________.

9. Seeing Eye dogs must be able to think for themselves. Although usually __________, they will refuse to obey an order to go forward if to do so might be dangerous.

10. Sometimes the owner tells the guide dog to cross a street where the traffic could be a danger. The dog will disobey the order and refuse to __________ until it’s safe to do so.

11. The guide dogs must be especially watchful on busy city streets. __________ who don’t look where they are going can be a serious problem.

12. If the guide dog senses danger it will refuse to go forward. It will __________ its owner to the danger, probably by barking loudly.

13. Seeing Eye dogs guide their owners skillfully in crowded places. Some of the __________ they might have to avoid are fire hydrants, power line poles, or trash barrels on the sidewalk.

14. The working life of a Seeing Eye dog is about ten years. It then spends its __________ as an ordinary family pet.

15. When it gets too old to do its job, a Seeing Eye dog is placed with another family. It probably takes some time before it gets __________ to its new home.
Lesson 2

1. Until the Spanish discovered it in the 1500s, chocolate was unknown in Europe. Until that time it was               only in Central and South America by the Aztecs.

2. The Aztec word chocolate means "bitter drink." The word was               into European languages after the Spanish conquest of Central and South America.

3. The Aztecs didn't use paper money or coins when they bought things. They paid for their               with cocoa beans.

4. Instead of dollars and cents, the Aztecs priced things in cocoa beans. Ten beans were               in value to one rabbit.

5. The first cocoa trees grew wild in Central and South America. Now cocoa trees are               in many other parts of the world.

6. The Ivory Coast in West Africa produces nearly half of the world's cocoa crop. It               over a million tons a year to countries around the world.

7. The United States is not a suitable place for growing cocoa trees. They grow best in               countries.

8. Cocoa beans grow close together inside each pod. The               varies in size from twenty beans to as many as forty.

9. Smelling fresh cocoa beans would not help you to identify them. The beans at that stage do not have the distinctive chocolate               .

10. Roasting makes the shells easier to crack open. This is because the heat makes them               .

11. Hot chocolate is a favorite drink for people of all ages. The               is especially popular in wintertime.

12. Dark chocolate has a slightly bitter taste. Those who prefer it consider milk chocolate to be rather               .

13. Chocolate can take several different forms. What we think of as chocolate is a               of cocoa powder, cocoa butter, dried milk, and sugar.

14. Cocoa powder is an important byproduct of chocolate production. It is made by               the fat from chocolate paste.

15. Some people find chocolate hard to resist. Those who have a               for it sometimes call themselves "chocoholics."
Lesson 3

1. Dinosaurs first appeared over 200 million years ago and died out 65 million years ago. That is a(n) ______________ of about 135 million years.

2. The world of the dinosaurs was vastly different from today's world. It is impossible to ______________ what it would have been like to live in those times.

3. The world at that time was a savage one of hunters and hunted. ______________ creatures would have stood no chance in such a world.

4. Dinosaur skeletons are found buried in rock. It is ______________ that the bones and the rock are about the same age.

5. Most creatures living tens of millions of years ago left no trace behind. Only a small number happened to be ______________ in rocks for us to discover.

6. A twenty-foot long Utahraptor may seem large, but it looks small when compared with the ______________ Tyrannosaurus Rex, which measured fifty feet.

7. Its ten-inch claws and huge, sharp teeth give Tyrannosaurus Rex a scary look. It is probably the most ______________ looking of all the dinosaurs.

8. Dinosaur teeth tell scientists what kind of creature the teeth belonged to. They show whether the creature was plant-eating or ______________.

9. The largest of all dinosaurs ate only plants. They were not equipped to fight and were the natural ______________ of meat-eaters such as Tyrannosaurus Rex.

10. Did a meteorite hitting the earth cause the dinosaurs to die out? Scientists who once thought this explanation ______________ now believe it to be correct.

11. A large meteorite could hit the earth again. The damage to our planet if that were to happen would be enormous, but life in some form would almost certainly ______________.

12. Perhaps dinosaurs never died out at all but eventually became today's birds. People have the ______________ of believing either explanation.

13. Those who believe that dinosaurs never died out at all point to Sinornis. They think that feathered dinosaurs are the ______________ of birds living today.

14. Is there a connection between feathered dinosaurs like Sinorsis and today's birds? The relationship between them is still ______________.

15. It may well turn out to be the case that birds are descended from dinosaurs. If that is so, then dinosaurs never really became ______________.
Lesson 4

1. The Pilgrims who boarded the Mayflower left for religious reasons. They ____________ of ever being able to practice their faith in England.

2. The Pilgrims wished to be free to practice their own religion in America. They ____________ all religious ties with England when they left.

3. A hundred and two passengers boarded the Mayflower. When they ____________ from England, they had little hope of ever seeing their native land again.

4. The Mayflower left Plymouth on September 6, 1620. Its ____________ was supposed to take it to Virginia.

5. Sailors in the 1600s steered mainly by the sun and stars. In those days it was impossible for them to know their position ____________.

6. Clocks and other instruments were not very reliable in the 1600s. At best they could tell those on board only ____________ where their ship was on the ocean.

7. Sailors knew their location when they were in sight of land. To ____________ across three thousand miles of open ocean using unreliable instruments was very difficult.

8. The passengers on the Mayflower set off with high hopes. Their spirits ____________ as weeks went by without sight of land.

9. After several weeks of fine weather, conditions changed. Strong ____________ in the mid-Atlantic carried the Mayflower north, away from Virginia.

10. The Mayflower was lucky to reach America, as shipwrecks were common in the 1600s. Not all ____________ ended successfully.

11. There was a burial at sea when one of the passengers died. The person got sick and could not be ____________.

12. Those on board had almost given up hope of reaching America. Then, after sixty-five days, land was spotted on the ____________.

13. The speck of land grew larger as the Mayflower approached Cape Cod. As the ship drew closer to the shore, the ____________ on board increased.

14. The Mayflower was supposed to land in Virginia. Its actual ____________ turned out to be five hundred miles to the north.

15. The Pilgrims took a few personal belongings with them. Looking at them in their new land must have made them feel ____________. 

Lesson Review Exercises
Lesson 5

1. What is it that attracts men and women to risk their lives climbing Everest? The ___________ of the mountain is hard to explain to nonclimbers.

2. Perhaps George Mallory thought it foolish for someone to ask him why he wanted to climb Everest. That might explain his ___________ reply, “Because it's there.”

3. Mallory made several unsuccessful attempts to climb Everest. The ___________ was not just to reach the top, but to be the first to do so.

4. Mallory's final climb up Everest took place in 1924 and ended with his death. Several ___________ attempts had also ended in failure.

5. Thousands of people have tried to climb Everest. The mountain’s extreme weather ___________ the attempt by five out of six climbers.

6. Nervous people would not enjoy mountain climbing. Looking down a thousand-foot ___________ mountain face while dangling from a rope can be especially scary.

7. The height of Everest has been carefully measured. Its ___________ is twenty-nine thousand and thirty-five feet above sea level.

8. There are several ways to climb Everest. Most climbers take the ___________ up the south side of the mountain.

9. Climbers must train hard before attempting to climb Everest. To try to make it to the top while in poor physical condition would be ___________.

10. The weather on the higher parts of the mountain changes with very little warning. ___________ can turn to despair when bad weather suddenly strikes.

11. A mass of ice, snow, and rocks can become dislodged near the peak. The ___________ gathers speed as it roars down the mountain.

12. Climbers must seek shelter from strong winds and falling snow. A ___________ on Mount Everest can last for hours or even days.

13. Climbers make their way very carefully up steep slopes. As they climb up, they look for ___________ to use as hand- or footholds.

14. Most climbers carry sturdy but lightweight tents. Having a tent makes having to rely on ___________ shelters unnecessary.

15. Most climbers of tall mountains admit to being afraid at times. They say that one of the benefits of climbing is learning to ___________ fear.
Lesson 6

1. The years leading up to the Civil War were marked by strong disagreements. Tension ________ between North and South until war broke out.

2. Those who helped slaves escaping from their owners put themselves at risk. It was a crime to ________ runaway slaves.

3. Stowe felt that she had to do something to help end slavery. She wrote *Uncle Tom’s Cabin* to ________ the people against what she felt was a terrible evil.

4. Slaveholders could break up whole families by selling their members separately. We cannot imagine the ________ suffered by the parents and their children.

5. There are some hateful people in *Uncle Tom’s Cabin*. Readers of the book probably feel the greatest ________ for Simon Legree.

6. Legree treated Uncle Tom brutally. Trying to make him whip the weak, female slave was a ________ act.

7. Punishment was harsh for slaves who displeased their masters. The whipping ________ on Uncle Tom was so severe that he died.

8. Eliza and her child are central to the story of *Uncle Tom’s Cabin*. These are the two ________ that readers probably care about the most.

9. Eliza made up her mind to escape. She made her decision after hearing the ________ news that her child was to be sold.

10. Southern slave owners were upset by *Uncle Tom’s Cabin*. They ________ Stowe for interfering in matters she didn’t understand.

11. Supporters of the South told Stowe to mind her own business and stay out of theirs. She would probably have replied that she was proud to be called ________

12. Stowe devoted her life to ending slavery. It must have made her very happy when slavery was ________ in 1863 by order of President Lincoln.

13. Stowe wrote other books besides *Uncle Tom’s Cabin*. It was her story of slavery in America that ________ her to world fame.

14. *Uncle Tom’s Cabin* was popular with readers all over the world. It was first ________ into German and then into many other languages.

15. Harriet Beecher Stowe shows that one person can make a difference. She was ________ in her determination to end slavery.
Lesson 7

1. Penguins are a popular feature of many aquariums. These __________ creatures always draw crowds of onlookers.

2. Gentlemen put on evening clothes only for special occasions. Penguins appear in “__________” dress all the time.

3. There are differences in appearance between one penguin and another. To a casual onlooker, however, they all __________ each other.

4. Antarctica, where penguins make their home, is not an easy place to get to. It is in a very __________ part of the world.

5. Antarctica is the coldest place on earth. The __________ air during the long winter night can measure minus seventy degrees.

6. Penguins are able to survive in the __________ climate.

7. Penguins need the company of other penguins in order to survive the extreme cold. That is why they live in large __________.

8. Penguins have learned to get along with each other. This is just as well, as up to half a million may be __________ together in one place.

9. There’s an old saying that birds of a feather flock together. That’s true of these birds of Antarctica, as a __________ penguin would be a very rare sight.

10. All birds lay eggs. Most do so in nests of twigs and grass, but female penguins __________ their eggs in nests made of stones.

11. Young penguin chicks have food brought to them by their parents. They are too __________ to survive on own.

12. Penguins need lots of food in order to stay alive. A(n) __________ part of their day is spent in the water hunting for fish.

13. Penguins long ago lost the ability to fly. They __________ for this by being excellent swimmers.

14. Flexible wings would not make good flippers for moving through water. The penguin’s __________ wings enable it to move quickly in the sea.

15. Penguins seem more at home in water than on land. On land they __________ awkwardly, but they move gracefully in the water.
Lesson 8

1. Thanksgiving is a popular holiday in the United States. It is ___________ each year on the third Thursday in November.

2. Thanksgiving brings families together around the dinner table. The centerpiece of the ___________ is usually a roast turkey.

3. The first Thanksgiving was held in late 1621. At that time the Pilgrims gave thanks for their first ___________.

4. Forty-one passengers had met the previous year in the Mayflower's main cabin. At that ___________, they drew up the rules by which they would govern themselves.

5. The set of rules was known as the Mayflower Compact. All those who signed it ___________ to observe the agreement.

6. The Mayflower carried everything the Pilgrims would need in the New World. Musical instruments, considered unimportant, were not part of the ___________.

7. Liquids were brought over on the Mayflower in watertight barrels. These ___________ could later be used by the Pilgrims to store water.

8. Axes were very important tools. With them the Pilgrims could ___________ logs from the forest trees to make their homes.

9. Everyone who was able to had to work. Small children might be given the ___________ of collecting firewood.

10. The Pilgrims were starving by the end of the winter. When Samoset visited them, their supplies of food had ___________ to almost nothing.

11. By early 1621, many had died and most of the others were sick. Just when things were most ___________, help arrived.

12. The Pilgrims were too feeble to defend themselves if attacked. Luckily the Wampanoags were not ___________.

13. It was important for the Pilgrims to know which berries could be eaten safely. The Wampanoags showed them which were ___________ and which were poisonous.

14. Other ships followed the Mayflower, bringing more goods and people from England. The Plymouth colony became quite ___________ as trade with England grew.

15. The Pilgrims took life very seriously. If they could come back today, they would probably think that most Americans lead very ___________ lives.
Lesson 9

1. The air inside a hot-air balloon is heated. This makes it less _______________ than the surrounding cooler air and causes the balloon to rise.

2. In 1783 a large crowd assembled to watch the Montgolfier brothers' hot-air balloon. Among the _______________ were members of the French royal family.

3. The Montgolfier brothers' hot-air balloon reached a height of 1,500 feet. Its flight _______________ after it had been in the air for eight minutes.

4. Unlike a kite, the Montgolfier brothers' hot-air balloon was not attached to the ground. People watched in amazement as the balloon _______________ to a great height.

5. A sheep, a duck, and a rooster were the first airborne creatures. Two months later, the first human flight in a balloon took place, a truly _______________ act.

6. By 1900, there was great competition to build a successful heavier-than-air machine. The first to _______________ this goal would be famous.

7. The Wright brothers made and repaired bicycles for a living. They _______________ their work on bicycles to concentrate on building a heavier-than-air machine.

8. Some early aircraft had as many as six wings, stacked above each other. Such airplanes were too _______________ to ever get off the ground.

9. Modern aircraft have rigid wings. Early attempts to _______________ the flapping of birds' wings ended in failure.

10. The first aircraft designers had a problem in trying to reduce the plane's weight. The lighter the aircraft, the more _______________ it was.

11. Steam engines are very heavy. It was _______________ to think they could ever be used to power aircraft.

12. The Wright brothers rejected the concept of steam-powered flight. After _______________ with different designs, they developed a lightweight gasoline engine.

13. The first flying machine took to the air in 1903. Only a few people were present to see the plane _______________ to a height of a few feet and stay in the air for twelve seconds.

14. The future _______________ of aircraft may not have been obvious to everyone. They might have been surprised to hear that one day aircraft would be flown around the world and even into space.

15. A visit to the National Air and Space Museum is a must in Washington, D.C. There you can see the plane that _______________ across the field at Kitty Hawk and then took off.
Lesson 10

1. Slavery had many defenders in the Congress of the 1850s. They based their attitude on the belief that the white race was ____________________ to all others.

2. Many slave owners claimed that their slaves were happy. The truth was that every slave ____________________ to be free.

3. White slave owners thought there was nothing wrong in owning slaves. They argued that people had been living in ____________________ for thousands of years.

4. There was once some uncertainty regarding the year of Harriet Tubman’s birth. It has now been ____________________ that she was born in 1820.

5. Harriet Tubman wanted desperately to free as many slaves as possible. She ____________________ her goal with a single-minded purpose.

6. The former slave had wealthy friends who wanted to help her. They made money ____________________ to her whenever she needed it.

7. The money Tubman earned at various jobs paid for her own living expenses. To do her real work she relied on ____________________ from her supporters.

8. She returned to the South many times to help others escape. There were ____________________ times when she was almost captured by reward hunters.

9. The $40,000 reward for capturing her was a lure for those who hunted Tubman. No one ever received the reward as she always ____________________ capture.

10. The Fugitive Slave Law was passed by Congress in 1850. It ____________________ anyone from helping a runaway slave.

11. It took courage to belong to the Underground Railroad. The law against helping runaway slaves made most people ____________________ to help Tubman and others like her.

12. The Civil War tore apart many families. Brothers sometimes ____________________ brothers, and fathers fought against sons.

13. Tubman made many trips behind enemy lines. On these ____________________ she tried to win slaves over to the Northern side.

14. Slaves were taught to fear the Northern soldiers. Tubman won their trust and was able to offer them ____________________ that they accepted.

15. 1863 is a significant year in American history. In that year, President Lincoln signed an order ____________________ all the slaves in the states fighting the North.
Lesson 11

1. Poems have been written about the joy of flying. They try to capture the ______________ feeling that comes from soaring far above the earth.

2. Flying an airplane alone for the first time is an unforgettable experience. Pilots never forget their first ______________ flight.

3. Many people are afraid of flying, especially going up for the first time. The more times you fly, the less ______________ you become.

4. All student pilots are nervous when flying alone for the first time. No matter how ______________ they try to seem, their hearts are beating a little more rapidly.

5. The way you walk tells something of how you feel. By ______________ rather than hurrying, you give the impression that you aren’t worried.

6. Instructor and student pilot should be compatible. It’s important that they have ______________ in each other.

7. Pilots go through a series of steps before takeoff. They ______________ from each item on the checklist to the next until all have been checked off.

8. Pilots do everything in a careful manner. By acting ______________ at all times, they avoid making mistakes that could be fatal.

9. Pilots must be alert for instructions from the ground. They remain in radio ______________ with the tower at all times.

10. Opening the throttle makes the engine turn faster. This causes the plane to ______________ until it reaches its takeoff speed.

11. An altimeter is an instrument that shows how high the plane is. It measures air pressure and gives the ______________ of the plane above sea level.

12. A plane burns the least amount of gas at its cruising speed. It consumes much more fuel when flying at ______________ speed.

13. To land, the pilot closes the throttle and pulls back on the stick when the plane is just inches off the ground. This causes the plane to ______________ and drop gently onto the runway.

14. Landing a plane can be tricky and even dangerous. Pilots ______________ themselves before landing in case they have to act quickly in an emergency.

15. Aircraft are usually parked on the airport tarmac. They are wheeled into the ______________ for overhauls and repairs.
Lesson 12

1. Frida Kahlo was born in Mexico in 1907 during the rule of Porfirio Diaz. At that time Mexican women stayed home and were ____________ from public life.

2. Even as a child, Frida found it hard to take orders from others. She remained a ____________ all her life, not always doing what was expected.

3. The young girl must have been the despair of her parents. She would not allow them, or anyone else, to ____________ to her what she must do.

4. Following the revolution, hospitals and schools were improved, and government support for the arts greatly increased. These changes were long _________________.

5. Kahlo called herself a child of the revolution. She wanted people to believe she had been born in 1910, the year the Diaz government was _________________.

6. The young Frida had two great passions. She ________________ her life to art and to the aims of the 1910 revolution.

7. Kahlo’s parents must have been horrified when their daughter expressed support for the revolution. That was no way for a girl with a strict Catholic ________________ to behave.

8. Her wearing men’s clothing must have been especially shocking to Frida’s parents. Such a sight was ________________ seen in Mexico at that time.

9. In her late teens, Kahlo had a terrible accident. A metal spike ________________ her side when she was thrown from a bus.

10. She was often in agony from the injury. To take her mind of the pain while she ________________, she started painting.

11. The first marriage between Kahlo and Rivera took place in 1929. She was quite unknown at the time, while he was one of Mexico’s most ________________ painters.

12. Rivera appears often in Kahlo’s paintings. Perhaps she found him so fascinating because he loved and ________________ her at the same time.

13. Kahlo painted Rivera many times. She also frequently portrayed herself, and many of her paintings are self-___________.

14. Kahlo and Rivera had a love-hate relationship. Each ________________ quarrel would be short-lived but then would be followed by another one.

15. Kahlo and Rivera found in each other something that made their work come alive. They ________________ each other’s passion for both life and art.
Lesson 13

1. Different animals have different ways of moving on land. Frogs hop and penguins waddle, while crocodiles ______________ when they leave the water.

2. Animals’ tails, too, come in all shapes and sizes. A beaver’s tail is spadelike, while that of a crocodile ______________ to a point.

3. Crocodiles and alligators are similar in many respects. One difference is that the fourth tooth of a crocodile can be seen sticking out from its ______________.

4. Crocodiles, like all reptiles, are cold-blooded. They are more active when it’s warm and become ______________ when the temperature drops.

5. To cool off, the crocodile digs a hole in the soft ground. It makes the hole large enough to ______________ its whole body.

6. A well-fed crocodile is not likely to be dangerous. How ______________ it is depends on how long it has been since its last meal.

7. Crocodiles hunt their prey from the water. A crocodile ______________ on land is unlikely to attack something or someone.

8. A crocodile under water is hard to see. Only its eyes and nostrils ______________ above the surface of the river or lake.

9. The crocodile moves to the attack without disturbing the surface of the water. Even a small ______________ would scare away its prey.

10. The crocodile is able to swim closer and closer without being seen. It only becomes ______________ when it leaps out of the water to attack.

11. Crocodiles eat almost anything. A fresh piece of meat or a week-old ______________ is equally tasty to a hungry croc.

12. Sometimes a crocodile kills an animal too large for a single meal. It takes what it cannot eat and ______________ it in a place to which it can later return.

13. Smaller crocodiles are sometimes eaten by larger ones. Spotting a bite-sized baby croc, all the big croc sees is a tasty ______________.

14. A croc has two powerful weapons to use against its prey. It can bite with its jaws and it can ______________ with its powerful tail.

15. Unlike its host, the crocodile bird doesn’t have to hunt for food. It flies into the croc’s mouth and ______________ on the scraps of meat stuck between its teeth.
Lesson 14

1. Edison's childhood was in some ways a solitary one. The other children at his school would not ____________ with him.

2. The young Edison withdrew from his schoolmates. He was quiet and thoughtful, while they were ____________ and unkind to him.

3. Edison showed from an early age that he was very strong-minded. He probably did not allow the ____________ of his classmates to upset him too much.

4. Edison never claimed to be a city boy. In fact, much of Michigan where he grew up was still ____________

5. Edison was granted over a thousand patents. Money received from these patents ____________ him with the funds to continue his research.

6. Two things made it possible for Edison to do so much. During his waking hours he was never ____________, and he needed less sleep than most people.

7. Edison didn't believe in wasting time. He ____________ almost every waking moment to working on or improving new inventions.

8. He was strict in his dealings with others. He would not ____________ laziness in himself or others.

9. The electric light bulb was probably Edison's most useful invention. Light was instantly ____________ with the flick of a switch.

10. Edison's light bulb was made of clear glass. Inside it a ____________ thread began to glow when electricity passed through it.

11. Edison tried many kinds of thread before finding one that worked. Such an effort on his part ____________ great patience.

12. The concept of electric light spread rapidly. Within a few years, whole cities were being ____________ by electricity.

13. Electric power soon became widely available in the United States. This brought about a total ____________ in people's lives.

14. Edison never really retired. He continued working until he died in 1931, in the ninth ____________ of his long and busy life.

15. Edison's place in history is secure. He was without doubt the most ____________ inventor of the nineteenth century.
Lesson 15

1. Hurricanes, tornados, floods and forest fires all do great damage. The greatest of all natural _____________, however, are earthquakes.

2. Earthquakes do most damage because they strike without warning. With a hurricane, people usually have enough time to _____________ to safety.

3. Those who have lived through a big earthquake never forget it. Once you have felt the ground _____________ beneath your feet, the earth never feels quite the same afterward.

4. The worst earthquake ever recorded happened in China in 1556. The damage was _____________, and almost a million people died.

5. The 1906 San Francisco earthquake started a terrible fire and killed 450 people. Those who survived it must have been _____________ until the danger passed.

6. Buildings need not collapse even in a large earthquake. Walls can be strengthened to keep them from _____________.

7. The location of an earthquake makes a difference to what happens. The more _____________ settled an area is, the less chance there is of serious damage.

8. Cities built on one of the earth’s faults are most at risk. _____________ areas like San Francisco and Los Angeles have been hit hard in recent decades.

9. Faults in the earth’s crust run through areas bordering the Pacific Ocean. These areas are _____________ to earthquakes.

10. The San Andreas Fault runs six hundred miles along California. It lies on a _____________ in the earth’s crust that causes seismologists to worry.

11. Seismologists are scientists who study earthquakes. The more they learn about them, the better they hope to become at _____________ when one will occur.

12. Seismologists track earthquakes wherever they occur. Each one is _____________ carefully in the hope of learning more about what causes these events.

13. The Richter scale measures the strength of earthquakes. The higher the number, the more _____________ the earthquake.

14. One number higher on the scale means a tenfold increase in strength. A _____________ earthquake that measures 8.0 packs ten times the punch of one rated 7.0.

15. A higher Richter number may not mean more damage or deaths. Even a _____________ earthquake can do damage if buildings are too flimsy to withstand the shock.
Lesson 16

1. Liliuokalani and Kalakaua occupied a high position in Hawaiian society. They counted the Hawaiian royal family among their ____________________.

2. King Lunalilo ruled for just one year. Following his death, Kalakaua ____________________ the position of ruler.

3. Kalakaua was an unexpected choice by Hawaii’s governing body. As the widow of the ________________ king, Queen Emma had been expected to succeed him as the new ruler.

4. Kalakaua found himself under pressure from the haoles, the white planters from the United States. He gradually ____________________ his powers and became ruler in name only.

5. In 1887 the whole world celebrated Queen Victoria’s fifty years on the English throne. Kalakaua sent his sister to attend the Golden ________________.

6. Liliuokalani’s rule as queen followed her brother’s death in 1891. She ____________________ for just two years until forced to step aside in 1893.

7. In 1893, a committee of haoles met to decide Hawaii’s future. It ____________________ Sanford Dole president of the new Republic of Hawaii.

8. The native Hawaiians felt helpless as they slowly lost control of the islands. The government of Hawaii became increasingly ________________ by the haoles.

9. The native Hawaiians disliked the government imposed on them by the haoles. The attempt to overthrow it was ________________ and the rebels thrown in prison.

10. Resentment against the haoles grew stronger. The native Hawaiians were ________________ into rebelling because they were losing control of their government.

11. Sanford Dole was looking for a reason to break the resistance of Liliuokalani’s followers. He may have used the ________________ that broke out as an excuse to interfere.

12. Liliuokalani was believed to be closely associated with the rebels. ________________ messages from her to them seemed to bear this out.

13. Liliuokalani believed she had to stand up to the haoles. She regarded herself as the ________________ of traditional Hawaiian values.

14. During World War One, Liliuokalani raised the Stars and Stripes for the first time. This showed that she had ________________ the United States for taking away her country.

15. The immediate cause of her action was the death of the first Hawaiian soldier in the war. She ____________________ the American flag as a gesture of goodwill.

Lesson Review Exercises
Lesson 17

1. Africa is the second-largest continent, after Asia. It __________ of over fifty countries, and its people speak over a thousand different languages.

2. The world’s largest desert, the Sahara, is in Africa. Travelers across it make their way from one ____________ to the next, spending a night at each as they proceed on their way.

3. The continent has suffered greatly because of both natural and man-made disasters. Hunger, disease, and war are three of Africa’s greatest _____________.

4. Some countries in Africa are quite prosperous. If the country is at peace and the soil is ____________, life can be good in these countries.

5. Climate changes greatly affect what happens to the land. Desert may _____________ to grassland in one part of the continent, and the opposite may occur somewhere else.

6. Cattle are a measure of wealth in many parts of Africa. A loss of ____________ means the size of the herd must be reduced.

7. Farmers in sub-Saharan Africa keep a close eye on the weather. Lots of rain means a good harvest, while little or no rain means the crops will ____________ and die.

8. Farmers are helpless as they watch their crops fail for lack of water. No longer able to survive on the ____________ land, the people move to the cities.

9. There’s no fixed duration by which to measure a long period without rain. Some ____________ last for a few weeks, while others go on for years.

10. Cutting down trees can be harmful for the land. Tree roots hold the soil in place and prevent it from being ____________ by heavy rains.

11. Makeshift camps are set up to house people fleeing the advancing desert. These camps are ____________ with people who have little hope for the future.

12. Babies born in these camps can expect to live there all their lives. Housing, education, and health services, if they are available at all, are often extremely _____________.

13. The people forced to leave home would like nothing better than for conditions to improve so that they can return to their farms. They are not ____________ by choice.

14. Food for the starving people arrives at African ports. For a variety of reasons, it often fails to reach the victims of _____________.

15. Ending world hunger is a challenge for rich countries. They will need to ____________ their efforts if they are to succeed.
Lesson 18

1. Disney started out with no money. He ______________ his uncle to lend him five hundred dollars to start his company.

2. Disney's early years in the film business were not easy. At first he could afford to pay himself only enough for a ______________ living.

3. Oswald, the Lucky Rabbit, was one of Disney's early creations. Mickey Mouse was ______________ to Oswald, as were the rest of the famous Disney characters.

4. The distributor handling Disney's movies tried to cheat him. The distributor even lured away the illustrators Disney had ______________ earlier.

5. Disney was dismayed by the distributor's underhanded ways. He felt ______________ and decided that in the future, he would control every part of the business himself.

6. On the journey back to Los Angeles, Disney made a decision. He ______________ never to sell his movies, but only to rent them from that point on.

7. By renting his films, Disney made life easier for himself. Distributors had fewer chances to make ______________ for him if he kept ownership of the films.

8. Disney and his wife were both excited by the idea of a cartoon mouse. They had a very ______________ discussion about it on the train journey home.

9. They named the new character Mickey Mouse. Mickey always seems to be happy and smiling, and it's hard to imagine him looking ______________.

10. Mickey Mouse is always getting into and out of trouble. He ______________ his way around all obstacles with a smile on his face.

11. The only things Mickey Mouse and a real mouse have in common is that both have a tail and ears. The ______________ between a real mouse and Disney's creation is slight.

12. Mickey Mouse was soon joined by Minnie Mouse, Goofy, and Donald Duck. These ______________ characters appeared together in many movies.

13. The first full-length talking picture appeared in 1927. Silent movies ______________ rapidly in popularity with the arrival of talking pictures.

14. The name of the first talking picture was The Jazz Singer. The movie created a ______________ when Al Jolson's voice rang out from the screen.

15. The arrival of sound had made silent movies ______________ overnight. Disney added a soundtrack to the third Mickey Mouse cartoon, Steamboat Willie.
Lesson 19

1. Pompeii was located about a hundred and thirty miles south of Rome. It was by Romans who preferred life in a small town to that of the great city of Rome.

2. About twenty thousand people lived in this prosperous port city. It had many public buildings and private homes.

3. Pompeii was nestled under Mount Vesuvius. The four-thousand-foot mountain was actually a volcano that had been for eight hundred years.

4. The people of Pompeii had no reason to fear the mountain. Even had they known it was a volcano, they would have thought the chance of its very small.

5. Over the centuries, pressure built up inside the volcano. These forces shook the earth in the A.D. 62 earthquake.

6. The earthquake should have served as a warning. The townspeople felt the from it but failed to connect the earthquake with the mountain towering over them.

7. The earthquake did some damage to buildings that were quickly repaired. But the earthquake was actually the to something far worse.

8. The top of the volcano gave no clue as to what lay beneath. rock had hardened to form a plug that acted like a cork in a fizzy bottle.

9. Far from declining after the earthquake, the pressure increased. In A.D. 79, the plug was in a tremendous explosion that released the built-up pressure.

10. What had seemed like a little heaven by the sea turned into a hell on earth. The air was filled with poisonous as hot lava, ash, and even boulders rained down.

11. The townspeople had no time to escape. Many were by the thick smoke and died on the spot.

12. Boiling water was forced up through cracks in the ground. People and animals were as they tried to flee the town.

13. It is impossible to get an accurate count of how many died in Pompeii. The number of those who was measured not in the hundreds but in the thousands.

14. Pompeii has much to teach us about life in the Roman Empire. Much of what we know comes from that were first begun in 1763.

15. Digging into the past continues to this day at Pompeii. The work is slow and, but very rewarding when a major discovery is made.
Lesson 20

1. A fable is a special kind of story. It makes us laugh, but it is intended to do more than just provoke ____________ in the reader.

2. A fable often has a serious purpose. The ones told by Aesop have a ____________ that teaches a lesson about life.

3. "A Tale of Two Donkeys" is a good example of a fable. It tells of a series of ____________ between a farmer and his daughter and the various people they meet.

4. The story pokes fun at the father. He is shown as a rather ____________ person with no mind of his own.

5. The farmer's problem is that he is so anxious to please everyone he meets. He ____________ with every suggestion made to him, no matter how unreasonable it is.

6. The pair make several stops on the way to the market. Each time, they change their positions before ____________ their journey.

7. The two start out with the farmer riding the donkey. The woman at the well feels ____________ for the daughter and scolds the father for riding while she walks.

8. Things get crowded when both try to ride the donkey, as the young man suggests. While there is ____________ room for one person, the donkey barely has room for two.

9. Carrying one person is easy for the donkey. Putting an extra person on the animal adds to its ____________

10. A woman they meet later is upset by what she sees. Her ____________ is aroused at the sight of two people riding one donkey.

11. The woman tells the farmer that he and his daughter should be carrying the donkey instead. He takes her ____________ seriously and ties the donkey's legs to a pole.

12. The sight of the farmer and his daughter carrying the donkey must have been hilarious. To carry such a ____________ load must have been very difficult.

13. The most difficult part of the journey was when both were carrying the donkey. They were forced to ____________ themselves in order to hold so much weight.

14. The farmer and his daughter stumbled along the road toward the market. They knew they were near their destination when they reached the ____________ of the town.

15. The story doesn't tell us what the daughter thought of her father's actions. We know she was obedient, but was she ____________ by her father's foolish behavior?

Book 5 Tests
Book 5, Lesson 1 Test

Choose the BEST way to complete each sentence or answer each question. Then fill in the circle next to your answer.

1. When you are given a class assignment, you are expected to
   A  appear at a certain time.
   B  sit in a certain place.
   C  complete a task.
   D  take charge of other people.

2. A patient is someone who is
   A  waiting in line at the store.
   B  being seen by a doctor.
   C  sitting quietly.
   D  trying to hurry.

3. My aunt will move to Florida after she retires. She will move after she
   A  changes jobs.
   B  makes more money.
   C  gets very old.
   D  stops working.

4. Two men could notudge the sofa. This was probably because the sofa was
   A  too heavy.
   B  too expensive.

   D  too likely to fall apart.

5. If your dog is obedient, it
   A  is friendly to strangers.
   B  bothers your neighbors.
   C  does what you tell it to do.
   D  has health problems.
6. The radio **alerted** us to the coming storm. As a result, we
   - did not expect the storm.
   - were ready for the storm.
   - felt relieved.
   - did not expect it to be serious.

7. To **accustom** yourself to life in another country, you must
   - get used to doing things in new ways.
   - introduce other people to your customs.
   - leave your family behind.
   - learn several languages.

8. I am looking for a **companion** for my trip to Mexico. Which of the following is a companion?
   - a tent that I can camp in
   - a tour group that I can join
   - someone to travel with
   - an inexpensive flight

9. Which could be a **concept** for a new invention?
   - a group of important scientists
   - a television commercial for the invention
   - an idea for a machine that does your homework
   - a scientific lab

10. Which of the following shows **obedience**?
    - Students use their imaginations.
    - Students help one another with their class work.
    - Students are noisy.
    - Students do what the teacher asks.

11. Kayla and her sister were not **compatible** until they were teenagers. Before they were teenagers, they probably
    - fought a lot.
    - were always mistaken for one another.
    - got along well.
    - shared everything with each other.
12. To which of the following can a student be assigned?

- A  his or her parents
- B  the principal's office
- C  a math group
- D  a best friend

13. We had our accustomed lunch of peanut butter and banana sandwiches. What does accustomed mean in this sentence?

- A  usual
- B  unusual
- C  stale
- D  delicious

14. Good baby-sitters are always alert. In this sentence, alert means

- A  watchful and wide-awake.
- B  fun and energetic.
- C  not easily upset.
- D  trained in first aid.

15. Which of the following is most likely to be burly?

- A  a baby
- B  a weight lifter
- C  a tulip
- D  a bicycle

16. I was jostled by the crowd in the subway station. I was

- A  pleased.
- B  scared.
- C  pushed and shoved.
- D  shocked and surprised.

17. After her retirement from banking, Ms. Wong decided to write mystery books. What did Ms. Wong do before she wrote mystery books?

- A  She wrote children's books.
- B  She traveled.
- C  She worked in banking.
- D  She did not work.
18. A person with a lot of patience is likely to
   A stand in a line for two hours to ride a roller coaster.
   B complain if their pizza is not delivered within a half hour.
   C be rude to others.
   D jump ahead in a long line.

19. Which is MOST likely to be a distraction for someone who is studying?
   A good lighting
   B a noisy TV
   C an empty house
   D notes taken in class

20. You will be most likely to see a pedestrian
   A on a bus.
   B in a children's hospital.
   C on a horse.
   D on a sidewalk.

21. Mr. Muñez retires at 10:00 p.m. every night. He
   A reads at 10 p.m. every night.
   B watches the news at 10 p.m. every night.
   C goes to bed at 10 p.m. every night.
   D talks on the telephone at 10 p.m. every night.

22. Which of the following gives an alert that there may be a fire?
   A a smoke detector
   B a fire hose
   C an escape ladder
   D a fire extinguisher

23. What would probably happen if there is an obstacle in the road?
   A traffic would speed up
   B traffic would slow down or stop
   C people would carpool to work
   D people would not know where to go
24. Professor Mateo has **assigned** the next chapter in this book. That means that she
   - A  told her class to read it.
   - B  wrote it.
   - C  discussed it with her class.
   - D  enjoyed reading it herself.

25. A person needs be **patient** in order to
   - A  eat dinner.
   - B  wait for a delayed train.
   - C  play in a band.
   - D  go into a hospital.

26. Cats are **accustomed** to taking long naps. This means that cats
   - A  are made restless by taking long naps.
   - B  can be trained to take long naps.
   - C  are used to taking long naps.
   - D  do not like taking long naps.

27. What might happen if a passenger **distracts** the driver of a car?
   - A  The trip will be more fun.
   - B  The passenger will have to drive.
   - C  They are less likely to get lost.
   - D  An accident might occur.
Book 5, Lesson 2 Test

Find a SYNONYM for each underlined word. Then fill in the circle next to your answer.

1. Purple is a combination of blue and red.
   - opposite
   - example
   - mix
   - result

2. Was he able to purchase the tickets?
   - locate
   - buy
   - provide
   - sell

3. We tried to make fresh salsa, but it tasted bland.
   - smooth
   - salty
   - delicious
   - flavorless

4. The aroma of rosemary filled the garden.
   - beauty
   - brightness
   - smell
   - quality

5. The fire consumed three blocks of the downtown area.
   - skipped
   - destroyed
   - scorched
   - wilted
6. That cluster of stars is called Orion's Belt.
   - group
   - line
   - pattern
   - glitter

7. One metric ton and 2,204 pounds are equivalent measures.
   - different
   - equal
   - large
   - small

8. There are cold beverages in the refrigerator.
   - desserts
   - drinks
   - snacks
   - salads

   - desires
   - fears
   - encounters
   - ignores

10. Mr. Yamamoto cultivates potatoes.
    - dislikes
    - prepares
    - sells
    - grows
Choose the BEST way to complete each sentence or answer each question. Then fill in the circle next to your answer.

11. To introduce two people, you must
   A. want to get to know them.
   B. know their names.
   C. be sure they are friends.
   D. pretend not to see them.

12. Calcium helps prevent brittle bones. Brittle bones
   A. improve your posture.
   B. are unusually strong.
   C. break easily.
   D. make you appear taller.

13. What is the best way to extract a splinter?
   A. Use tweezers to pull it out.
   B. Flatten it with a small hammer.
   C. Sand it with sandpaper.
   D. Put an ice cube on it.

14. After the principal’s introduction, Mr. Sills stood up and gave his speech. Which best describes what the principal did?
   A. He gave a long speech.
   B. He embarrassed himself.
   C. He presented a slide show.
   D. He told the audience who Mr. Sills was.

15. We were surprised by the tropical air in the greenhouse. In this sentence, tropical means
   A. sweet-smelling.
   B. hot and dry.
   C. hot and moist.
   D. cold and damp.
16. Which of the following does a car consume?
   ④ gears and wheels
   ③ passengers
   ② repair work
   ① gasoline

17. To cultivate a child’s interest in dance is to
   ④ discourage it.
   ③ encourage it.
   ② not pay any attention to it.
   ① make fun of it.

18. Vikram introduced his guests to traditional Indian foods. This means that
   ④ Vikram had his guests meet the cook in an Indian restaurant.
   ③ Vikram asked his guests to cook Indian food.
   ② Vikram’s guests ate Indian food for the first time.
   ① Vikram’s guests already enjoyed eating Indian food.

19. An extract from a book is
   ④ a review of the book.
   ③ a part that has been taken out of a book.
   ② a summary of a book.
   ① the illustrations in a book.

20. Canada exports lumber to many other countries. This means that lumber is
   ④ prepared in Canada and shipped to other countries.
   ③ prepared in other countries and shipped in Canada.
   ② is highly taxed in Canada.
   ① hard to find in China.

21. America obtained valuable territory from France through the Louisiana Purchase in 1803. America
   ④ lost the territory during a war with France.
   ③ sold the territory to France.
   ② bought the territory from France.
   ① traded the territory for piece of land in France.
22. The introduction to a book can be found
   A. in the front of the book.
   B. on the back cover of the book.
   C. in the back pages of the book.
   D. in a magazine or newspaper.

23. Unfortunately, Kareem was able to extract some information about the surprise party. What does extract mean in this sentence?
   A. promise to someone
   B. plan ahead of time
   C. spread secretly
   D. obtain with difficulty

24. Mr. Martin made bland conversation with the woman sitting next to him on the plane. Their conversation was probably
   A. lively.
   B. upsetting.
   C. unexciting.
   D. in a foreign language.

25. Which of the following is a tropical place?
   A. the Amazon Rainforest
   B. the South Pole
   C. the Pacific Ocean
   D. New York City

26. Which of the following is the equivalent of 25 cents?
   A. a dollar
   B. a quarter
   C. a dime
   D. a nickel

27. Tae kwon do usually consumes Amy’s weekends. This means that on the weekends Amy
   A. has time for nothing else but tae kwon do.
   B. has no time for tae kwon do.
   C. often skips her tae kwon do lesson.
   D. practices tae kwon do at dinnertime.
28. Rico had a **craving** for a tomato and mayonnaise sandwich. In this sentence, **craving** means
   A. a lunchbox
   B. a recipe
   C. a strong desire
   D. a strong dislike

29. If you are unhappy with a **purchase** you made, what might you be able to do?
   A. Ask the person who gave it to you to take it back.
   B. Practice harder so that you will do better next time.
   C. Take it back to the store and exchange it for something else.
   D. Ask whether you can choose another subject.

30. Computers were **introduced** to people’s homes in the early 1980s. This means that home computers
   A. were invented at this time.
   B. came into common use at this time.
   C. were first thought of at this time.
   D. were experimented with at this time.

- a check for $50.
- a request for funds.
- a charity.
- a report on finances.

26. To *yearn* is to

- groan about something.
- long for something.
- plan something.
- struggle to get something.

27. To *oppose* something is to

- study it carefully.
- act out against it.
- prohibit it.
- support it.

28. What might a cat *pursue*?

- a dog
- cat food
- a long nap
- a mouse
29. To have occasional headaches is to have

A. painful headaches.
B. mild headaches.
C. headaches every once in a while.
D. frequent headaches.
THE EARLY DAYS OF AIR TRAVEL

When passenger air travel was introduced to Europe in the 1920s, it was at first rough and uncomfortable. The planes were noisy, unheated, and able to hold only a few people. However, flying from England to France was much quicker than crossing the English Channel by boat. A plane could depart from London and arrive in Paris in a mere three hours. It was no wonder the number of Europeans traveling by plane soared during this decade.

Airlines did all they could to make flying attractive and to convince the public that air travel was a superior form of transportation. They emphasized, of course, the speed of planes. They also stressed that flying was safe. They tried many things to lure customers. Some airlines even called attention to some celebrated people who calmly traveled by air.

Over the next 20 years, substantial changes took place in air travel. The planes become quieter and more comfortable. Meals were served on the flights. In America, the first air "hostess," a trained nurse, was hired in 1930. Traveling in an American DC3 was the height of luxury in the 1930s. DC3 airplanes carried no more than 14 passengers. Sleeping platforms folded down from a wall, and curtains provided privacy as the passengers slept. In the morning, they were roused by a crew member bringing breakfast foods and hot beverages on a tray. By 1932, the duration of a cross-country flight—with several stops—had been reduced to 24 hours.

Air travel has made taken great steps forward since its early days. After all, our gigantic planes cross the continent in no more than six hours. However, some passengers who have become accustomed to being cramped in narrow seats for the entire afternoon cannot help but wonder if every change has been for the better.
1. Read this sentence from the passage.
When passenger air travel was introduced to Europe in the 1920s, it was at first rough and uncomfortable.
What does introduced mean in this passage?
   A made known by name
   B brought into use
   C called to someone's attention
   D welcomed a guest speaker

2. Read this sentence from the passage.
   A plane could depart from London and arrive in Paris in a mere three hours.
   A synonym for depart is
   A arrive
   B rise
   C leave
   D escalate

3. Read these words from the passage.
   the number of Europeans traveling by plane soared during this decade
   In this passage, soared means
   A suddenly became greater
   B flew like a bird
   C coasted
   D began to descend

4. Read this sentence from the passage.
   Airlines claimed that air travel was a superior form of transportation.
   What is another word for superior?
   A speedy
   B useful
   C reasonable
   D excellent
5. Read this sentence from the passage.
   They tried many things to lure customers.
   What is a synonym for lure?
   A  bait  
   B  trick  
   C  attract  
   D  comfort

6. Read these words from the passage.
   Some airlines even called attention to some celebrated people.
   What is a synonym for celebrated?
   A  rich  
   B  famous  
   C  fearless  
   D  remarkable

7. Read this sentence from the passage.
   Over the next 20 years, substantial changes took place in air travel.
   What does substantial mean in this passage?
   A  very heavy  
   B  sudden  
   C  expensive  
   D  many

8. Read these words from the passage.
   they were roused by a crew member
   What is a synonym for roused?
   A  awakened  
   B  fed  
   C  excited  
   D  called
9. Read these words from the passage.
   bringing breakfast foods and hot beverages
   A synonym for beverages is
   
   A  towels.
   B  water.
   C  drinks.
   D  cereals.

10. Read these words from the passage.
    the duration of a cross-country flight
    In this passage, duration means
    
    A  the speed of the flight.
    B  the length of the flight.
    C  the distance of the flight.
    D  the number of people on the flight.

11. Read this sentence from the passage.
    After all, our gigantic planes cross the continent in no more than six hours.
    What is a synonym for gigantic?
    
    A  huge
    B  noisy
    C  uncomfortable
    D  modern

12. Read these words from the passage.
    some passengers who have become accustomed to being cramped in narrow seats
    What does this mean?
    
    A  some passengers are directed to narrow seats.
    B  some passengers are hostile to narrow seats.
    C  some passengers are assigned to narrow seats.
    D  some passengers are used to sitting in narrow seats.
THE DONNER PARTY

Though the pioneer times were an exciting era in American history, not all pioneer tales are success stories. In 1846, a wagon train of farm families led by George Donner left Illinois. Their destination was California—2,000 miles away. When they arrived in Utah, members of the group talked the others into using a shortcut. The route was supposed to be shorter and easier for the pioneers, but the land was unfamiliar to them and they wasted valuable time trying to find their way. Their wagons reached the Sierras just as heavy winter snows were due.

When the Donner party was deep in the mountains, a severe winter storm trapped them. They made camp where they were, moving into one deserted cabin and building several makeshift ones. Unfortunately, the winter was unusually harsh and their attempts to continue on were unsuccessful.

They soon consumed all the food that they had available, and they were unable to find much game or edible plants in the frozen mountains. They used extreme measures to stay alive. The party ate a thick soup made from the hides of their dead cattle.

After two grim months in the mountains, all were starving and feeling desperate. Fifteen people volunteered to go on snowshoes to California and get help. Of all those in the camp, they were the strongest. Many of their companions had died or were very ill. Eight members of this heroic band died along the way. When the remaining seven reached California, it was a month before rescue teams could reach the stranded party. Of the 78 people who had been trapped in the mountains, only 45 survived. Twelve-year-old Virginia Reed was one of them. When asked about her experience in the mountains, she gave this advice: “Never take no cut-offs and hurry along as fast as you can.”
1. According to this passage, what is a destination?
   A  a path to follow
   B  someone's home country
   C  someone's starting place
   D  the place to which someone is going

2. In this passage, route means
   A  the guide of a wagon train.
   B  the end of the wagon train.
   C  a course that one follows to get somewhere.
   D  a super highway.

3. A makeshift cabin is
   A  a cabin made out of stone.
   B  a mountain home.
   C  a place for hunters to stay.
   D  a temporary place to live.

4. A harsh winter is likely to be
   A  milder than usual.
   B  very cold with many blizzards.
   C  longer than usual.
   D  sometimes sunny and sometimes snowy.

5. In this passage, what does consumed mean?
   A  destroyed
   B  spent
   C  ate
   D  cooked

6. What does available mean in this passage?
   A  paid for
   B  carried along
   C  used up
   D  ready to use
7. **Edible** plants
   - ① can be eaten.
   - ② grow in the winter.
   - ③ are found in mountains.
   - ④ are easy to spot.

8. The party was trapped for two **grim** months. You can tell that those months must have been
   - ① difficult and painful.
   - ② between September and February.
   - ③ in the middle of winter.
   - ④ longer than usual.

9. Which of these words is the BEST synonym for **desperate**?
   - ① angry
   - ② trapped
   - ③ hopeless
   - ④ weak

10. A **companion** is
    - ① someone who has to be cared for.
    - ② someone you spend time with.
    - ③ a person whom you do not trust.
    - ④ a person in a dangerous situation.

11. What is a synonym for **heroic**?
    - ① courageous

B a volume of encyclopedias  
C several magazines  
D a letter
17. The encounter at Bunker Hill was costly for both sides. Encounter means
   A. battle  
   B. reunion  
   C. feast  
   D. mistake

18. Brandon’s indignation was caused by
   A. finishing his report ahead of time.  
   B. bending over for too long.  
   C. hearing Aaron insult him.  
   D. working in the sun without a shirt.

19. After intermission, Sela resumed her place in the back row. This means that
   A. she offered it to an elderly woman.  
   B. she moved to an empty seat in the front row.  
   C. she took someone else’s seat.  
   D. she sat in the same place she was sitting before.

20. How might you react to a ridiculous idea?
   A. by discussing it  
   B. by laughing  
   C. by supporting it  
   D. by frowning

21. Haley was distressed to learn that
   A. there would be an exam tomorrow morning.  
   B. she didn’t have to do the dishes.  
   C. she’d been accepted to play in the band.  
   D. her experiment had worked.

22. An ample supply of food will
   A. run out quickly.  
   B. feed only a few people.  
   C. provide more than enough for everyone.  
   D. be acceptable to vegetarians.
23. Compassion for the stray animals caused Larisa to
   A. forget about them.
   B. complain about them.
   C. joke about them.
   D. give them shelter.

24. Damien had never encountered flamenco dancing until he took a trip to Spain.
    This means that Damien
   A. rarely practiced flamenco.
   B. had never seen or tried flamenco.
   C. had never liked flamenco.
   D. had never had a good dance partner.

25. Madison didn’t want to exert herself so she
   A. spent the day doing work in the yard.
   B. taught her cousin to swim.
   C. repaired the leaky sink.
   D. took a long nap in the shade.

26. Which of the following could be a moral duty?
   A. brushing your teeth
   B. preserving the environment
   C. doing your homework
   D. e-mailing your friend

27. Sergio lives on the outskirts of St. Petersburg. Sergio lives
   A. in the next town over.
   B. at the feet of mountains.
   C. not far from the center of St. Petersburg.
   D. miles away from St. Petersburg.

28. Which of the following is considered ridicule of Abraham Lincoln?
   A. visiting his monument in Washington, D.C.
   B. printing cartoons that made fun of his looks
   C. debating his ideas
   D. reciting his speeches at public events
29. To **burden** your friend with a problem is to
   - work with her to solve it.
   - challenge her to solve it.
   - add your problem to her problems.
   - give her advice.

30. The horse **encountered** a stone wall. **Encountered** means
   - came to.
   - jumped over.
   - circled.
   - threw itself against.

31. Rachel was only **jesting** when she said she'd paint the house purple. **Jesting** means
   - thinking aloud.
   - planning ahead.
   - joking.
   - lying down.
THE TEMPEST

The main character in Shakespeare’s play The Tempest is Prospero, who was once the Duke of Milan. With the aid of King Alonso, Prospero’s brother overthrew Prospero and made himself Duke. He then sent Prospero and his daughter, Miranda, out to sea in an old boat. Fortunately, Prospero and Miranda found refuge on an island. While Miranda was growing up, Prospero became an accomplished magician and employed spirits to do his bidding.

The play begins on a ship during a tempest. On board are Prospero’s enemies—his brother Sebastian and King Alonso—along with King Alonso’s son Ferdinand. When the ship is wrecked, the crew and passengers are all washed ashore.

King Alonso fears that his son Ferdinand has perished. However, Ferdinand has landed alone on another part of the island. There Ferdinand encounters Miranda and falls in love with her. Miranda takes Ferdinand to her father.

As Alonso and Sebastian search for Ferdinand, they become very hungry. They are frightened by a magical banquet that appears and then disappears. Becoming visible to them, the spirit Ariel tells them that they deserve to be punished for their earlier crimes. They begin to regret what they have done to Prospero and his daughter.

The play ends when all of the characters come face to face. Alonso is overjoyed to see his son alive but ashamed that he has discovered what he’d done in the past. It is agreed that Ferdinand and Miranda will marry and that all earlier wrongs will be pardoned and made right. Prospero once again becomes Duke of Milan. He vows to give up his magic and he sets his magical spirits free.

1. What does character mean in this passage?
   A a person in a story
   B the qualities that make up a person
   C a symbol used in printing
   D a ridiculous person
2. In this passage, *overthrew* means
   A. threw past the target.
   B. threw overboard.
   C. ended someone’s rule.
   D. rejected a sweetheart.

3. When they found *refuge* on the island, they found
   A. shelter from bad weather.
   B. a safe place to live.
   C. another runaway.
   D. spirits living there.

4. Prospero was an *accomplished* magician. A synonym for *accomplished* is
   A. well-known.
   B. substantial.
   C. assumed.
   D. expert.

5. In this passage, *employed* means
   A. enslaved.
   B. brought in.
   C. paid a wage to.
   D. used.

6. A *tempest* is
   A. a ship that is sinking.
   B. a riot.
   C. a wild storm with wind and rain.
   D. a blizzard.

7. Read this sentence from the passage.
   King Alonso fears that his son Ferdinand has *perished*.
   What is an antonym for *perished*?
   A. survived
   B. drowned
   C. complied
   D. despaired
8. Read this sentence from the passage.
   There Ferdinand encounters Miranda and falls in love with her.
   What does encounters mean in this passage?
   
   A  introduces himself.
   B  meets unexpectedly.
   C  pledges himself to.
   D  holds a long conversation with.

9. Read these words from the passage.
   a magical banquet that appears and then disappears.
   What does banquet mean in this passage?
   
   A  a bunch of flowers.
   B  a frightening spirit.
   C  a feast.
   D  a small band of musicians.

10. Read this sentence from the passage.
    Becoming visible to them, the spirit Ariel tells them that they deserve to be punished for their earlier crimes.
    Before Ariel becomes visible to the men, they
    
    A  argue with him.
    B  are scared by his monstrous appearance.
    C  are unable to see him.
    D  run from him.

11. Read these words from the passage.
    all earlier wrongs will be pardoned
    In this passage, pardoned means
    
    A  set free from jail.
    B  set free from slavery.
    C  punished.
    D  forgiven.
12. Read these words from the passage.
he **vows** to give up his magic
What is a synonym for **vow**?

A  promise  
B  agree  
C  refuse  
D  hesitate
PETRIFIED FOREST NATIONAL PARK

In northeastern Arizona, the Petrified Forest National Park includes six forests of “stone trees”—one of the world’s largest and most colorful displays of petrified wood. The park covers over 93,533 acres and consists of six separate “forests” that took over 200 million years to form. Long ago, this area was a flood plain dominated by groves of tall trees. As the giant trees died naturally, they toppled and rolled down slight slopes into shallow swamps. There they formed dense log jams. Before the logs could deteriorate, they became water-logged and sank into the swamps.

Flood waters and streams proceeded to flow into the swamps, bringing minerals and ashes from nearby volcanic eruptions. About four hundred feet of sandy mud covered the logs, turning into sandstone and shale.

Far below, the logs were undergoing a mysterious transformation. Minerals, mostly quartz, were penetrating the logs and replacing the cells made of vegetable matter. As the logs petrified, they retained their original shapes.

For millions of years the logs were concealed under layers of sandstone. Over time, erosion wore away the soft sandstone but not the hard quartz logs. Today these stone forests draw thousands of visitors a year to this desert area. The visitors are fascinated by the variety of colors of quartz seen there—red, brown, green, yellow, blue, and purple. If you decide to visit the site, you may hear a park ranger or tour guide refer to the petrified trees as the Rainbow Forest.

1. In this passage, dominated means

A  clouded.
B  rose high above.
C  had an important position.
D  reigned over.
2. What does *toppled* mean in this passage?
   A) rotted
   B) lost their powers
   C) fell over
   D) catapulted

3. A *dense* log jam is
   A) tightly packed.
   B) hard to see through.
   C) increasing.
   D) immense.

4. What does *proceeded* mean in this passage?
   A) went in front of
   B) happened before
   C) was forced
   D) went on

5. In this passage, *eruptions* are
   A) outbursts of anger.
   B) bursts of molten rock.
   C) visible volcanoes.
   D) poisonous fumes.

6. A synonym for *transformation* is
   A) combination.
   B) movement.
   C) change.
   D) excavation.

7. What does *penetrating* mean in this passage?
   A) stabbing
   B) piercing
   C) investigating
   D) passing into
8. The logs petrified in the swamp. The logs
   • became frightening to look at.
   • turned to stone.
   • sank deeper.
   • slowly fell apart.

9. Read these words from the passage.
   they retained their original shapes
   What is an antonym for retained?
   • lost
   • kept
   • established
   • preserved

10. Read this sentence from the passage.
    For millions of years the logs were concealed under layers of sandstone.
    In this passage, concealed means
    • weighted down.
    • forgotten.
    • hidden.
    • put away in a safe place.

11. According to this passage, what happened during the process of erosion?
    • The trees began turning to stone.
    • Wind and rain wore away the soft sandstone.
    • The quartz turned into different colors.
    • The logs were dug up by park rangers.

12. Read these words from the passage.
    The visitors are fascinated by the variety of colors.
    This means that
    • the visitors feel small in the forest.
    • the visitors are illuminated by the forest.
    • the visitors are made nostalgic by the forest.
    • the forest hold the visitors' attention and interest.
THE REMARKABLE NELLY BLY

Elizabeth Cochran was born into a large prosperous family in 1864. However, her father died when she was six, and the family fortunes declined. At fifteen, she started teachers’ college but had to drop out for lack of money. It seemed unjust that her poorly educated brothers landed jobs as clerks but jobs for women were mostly restricted to work as servants and factory hands.

For five years she helped her mother run a boarding house. One day she read an upsetting article in the Pittsburgh Dispatch. It was written by a man who looked at the past with great deal of nostalgia. He stated that women belonged in the home and that it was monstrous for a woman to try to make a living outside of it. Elizabeth was so indignant that she wrote a long letter to the editor pointing out that many women had no choice but to work for a living. Impressed by her spirit, the editor asked her to see him.

He offered her a job, and she took the pen name Nellie Bly. At first, she was able to write the stories that she wanted. She tried to bring moral issues—poverty, child labor, and the poor treatment of factory girls—to the public’s attention. When she was asked to work on the women’s pages, she went to Mexico instead and sent back stories that reflected her aggressive attitude toward getting news.

Back home, she went to see the editor of the New York World. She proposed a story to him: she would investigate conditions in an institution for mad people—from the inside. She assumed madness and was easily admitted to an institution. After several days, she tried to convince the doctors that she was sane, but they refused to believe her. Once the newspaper’s lawyer got her released, she wrote a shocking story about the staff’s cruelty.

All her life, Nellie continued to do things and write stories that amazed the public. She was among the most brilliant and well-known newspaper writers of her time. She died in 1922, on the same day that one of her closest friends died—the man who had written the same exasperating article about women belonging in the home.
1. What does prosperous mean in this passage?
   - respected.
   - wealthy.
   - well-known.
   - celebrated.

2. A synonym for restricted is
   - given.
   - reserved.
   - limited.
   - dedicated.

3. Nostalgia is the feeling that
   - the past was a better time.
   - the past is better forgotten.
   - the world is always getting better.
   - women should be homemakers.

4. In this passage, monstrous means
   - huge.
   - shocking.
   - deformed.
   - frightening.

5. What does indignant mean?
   - angry about something that seems unfair
   - cold and indifferent
   - better informed
   - miserable

6. Nelly Bly addressed moral issues in her newspaper articles. These articles had to do with
   - recipes and cooking.
   - her family.
   - questions of right and wrong.
   - secrets and gossip.
7. Nelly Bly was an aggressive reporter. In this passage, aggressive means

A fierce.
B bold.
C beginning.
D uneducated.

8. To investigate conditions is to

A look into them closely.
B wish they were better.
C do nothing about them.
D make improvements to them.

9. How did Nelly Bly assume madness?

A She understood madness.
B She took madness for granted.
C She pretended to be mad.
D She pretended to be a doctor.

10. A synonym for convince is

A propose.
B persuade.
C alert.
D proclaim.

11. In this passage, brilliant means

A shining.
B heroic.
C under appreciated.
D clever.

12. The exasperating article in this passage caused Nelly Bly to feel

A annoyed.
B hilarious.
C ridiculous.
D foolhardy.
Book 5, Final Test 4 (Lessons 1–20)

Read the passage. Choose the best answer for each item that follows. Then fill in the circle next to your answer.

VERY GRIM FAIRY TALES

Folk tales and fairy tales are often considered children’s entertainment. You are probably familiar with such stories as Cinderella and Rumpelstiltskin. As originally told, these folk tales were different from the stories that you know. Many of our long-ago ancestors told these stories to entertain their friends and families, but also to establish guidelines for proper behavior.

In 1806, two brothers named Jacob and Wilhelm Grimm were inspired to start collecting and preserving the stories of their homeland. Very methodically, they collected and recorded more than 200 tales. Today we know this collection as Grimm’s Fairy Tales.

The original stories bear a general likeness to the versions you probably know. The most significant characters have some sort of hardship, poverty, or disaster to overcome. They are certain to overcome their afflictions, however, because they are kind-hearted, clever, and hardworking. And in the end, they do. They become wealthy, notable, or they liberate their loved ones from horrible spells or villains.

The losers are foolhardy and greedy. In both the older and newer versions, the wicked live unhappily ever after, but the original tales were much more grim. In painstaking detail, the story-tellers described the horrible punishments inflicted on the wicked. The lesson of the story and the price of ignoring it could not be easily forgotten.

1. Which of the following could be your ancestors?
   - [ ] your closest friends
   - [ ] your teachers
   - [ ] your children and grandchildren
   - [ ] your grandparents and great-grandparents
2. In this passage, **establish** means
   - A) prove.
   - B) found.
   - C) set up.
   - D) remove.

3. What did the brothers Grimm do to **preserve** the stories of their homeland?
   - A) They collected and recorded them.
   - B) They read them aloud.
   - C) They gave them away.
   - D) They made movies out of them.

4. The Grimms were **methodical** about their task. What does this mean?
   - A) They did not want to complete their task.
   - B) They did not tell anyone about their task.
   - C) They would not allow anyone to help with their task.
   - D) They were careful and orderly with their task.

5. In this passage, **likeness** means
   - A) similarity.
   - B) portrait.
   - C) photograph.
   - D) difference.

6. What are the most **significant** characters?
   - A) the characters that appear most often
   - B) the oldest characters
   - C) the most important characters
   - D) the most wicked characters

7. What does **disaster** mean in this passage?
   - A) a brief meeting
   - B) a great misfortune
   - C) a slight illness
   - D) a foreign language
8. The story characters must overcome their **afflictions**. A synonym for **affliction** is
   - A  suffering.
   - B  fear.
   - C  nervousness.
   - D  tiredness.

9. Some characters **liberate** their loved ones from spells. What is a synonym for **liberate**?
   - A  lose
   - B  transform
   - C  teach
   - D  free

10. An antonym for **foolhardy** is
    - A  mischievous.
    - B  hilarious.
    - C  wise.
    - D  strong.

11. According to the passage, the original tales were more **grim**. This means that the original tales were more
    - A  interesting.
    - B  frivolous.
    - C  true.
    - D  disturbing.

12. **Painstaking** details
    - A  are not important.
    - B  show great effort.
    - C  are easy to collect.
    - D  are hurtful to read.

## Answer Key

### Lesson 8

| 1. | C          |
| 2. | B          |
| 3. | A          |
| 4. | D          |
| 5. | D          |
| 6. | C          |
| 7. | B          |
| 8. | A          |
| 9. | C          |
| 10. | D         |
| 11. | C        |
| 12. | B         |
| 13. | A         |
| 14. | C         |
| 15. | D         |
| 16. | B         |
| 17. | B         |
| 18. | C         |
| 19. | B         |
| 20. | B         |
| 21. | B         |
| 22. | C         |
| 23. | A         |
| 24. | D         |
| 25. | B         |
| 26. | C         |
| 27. | B         |
| 28. | D         |
| 29. | C         |

### Lesson 10

| 1. | B          |
| 2. | D          |
| 3. | C          |
| 4. | C          |
| 5. | A          |
| 6. | D          |
| 7. | B          |
| 8. | A          |
| 9. | C          |
| 10. | B        |
| 11. | A         |
| 12. | B         |

### Midterm Test 2

(Lessons 1–10)

| 1. | D          |
| 2. | C          |
| 3. | D          |
| 4. | B          |
| 5. | C          |
| 6. | D          |
| 7. | A          |
| 8. | A          |
| 9. | C          |
| 10. | B       |
| 11. | B         |
| 12. | D         |
| 13. | C         |
| 14. | B         |
| 15. | B         |
| 16. | C         |
| 17. | A         |
| 18. | C         |
| 19. | B         |
| 20. | C         |
| 21. | C         |
| 22. | A         |
| 23. | A         |
| 24. | C         |
| 25. | A         |
| 26. | B         |
| 27. | B         |
| 28. | D         |
| 29. | C         |

### Lesson 11

| 1. | D          |
| 2. | B          |
| 3. | A          |
| 4. | C          |
| 5. | D          |
| 6. | B          |
| 7. | A          |
| 8. | C          |
| 9. | D          |
| 10. | C       |
| 11. | C         |
| 12. | B         |
| 13. | A         |
| 14. | C         |
| 15. | D         |
| 16. | B         |
| 17. | D         |
| 18. | A         |
| 19. | B         |
| 20. | B         |
| 21. | B         |
| 22. | C         |
| 23. | D         |
| 24. | A         |
| 25. | C         |

### Midterm Test 1

(Lessons 1–10)

| 1. | B          |
| 2. | C          |
| 3. | A          |
| 4. | D          |
| 5. | C          |

| 6. | B          |
| 7. | D          |
| 8. | A          |
| 9. | C          |
| 10. | B        |
| 11. | A         |
| 12. | D         |
| 13. | C         |
| 14. | D         |
| 15. | B         |
| 16. | C         |
| 17. | D         |
| 18. | C         |

| 31. | A      |
| 32. | B      |
| 33. | C      |

| 34. | D      |
| 35. | C      |
| 36. | B      |
