## Perpendicular and Parallel Line Segments

## Vocabulary

Fill in the blanks. Use the words in the box.

1. $\qquad$ lines are a set of lines that will never meet no matter how long they are drawn.
2. Parallel lines are always the same
right angle perpendicular parallel distance
apart.
3. lines are two straight lines that meet or cross at a
$\qquad$ or $90^{\circ}$.

## Concepts and Skills

Which pair of lines is parallel and which pair of lines is perpendicular? Write parallel, perpendicular, or neither.
4.
a.

b.

Fill in the blanks with perpendicular or parallel.

5. $\overline{A B}$ is $\qquad$ to $\overline{D C}$.
6. $\overline{D C}$ is $\qquad$ to $\overline{B C}$.
7. $\overline{A D}$ is $\qquad$ to $\overline{B C}$.
8. $\overline{A D}$ is $\qquad$ to $\overline{A B}$.

Name a pair of perpendicular line segments and a pair of parallel line segments.
9.

The perpendicular line segments are
$\qquad$
The parallel line segments are
$\qquad$ _.

Identify a pair of perpendicular line segments and a pair of parallel line segments on the figure shown. Use a straightedge and a protractor or drawing triangle to help you.
10.

|  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | $F$ |  |  |  |  | $G$ |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  | $M$ |  |  |  |  |  |  |  |  |
|  |  |  | $L$ |  |  |  |  |  |  |
| $K$ |  |  |  |  | $H$ |  |  |  | $I$ |
|  |  |  |  |  |  |  |  |  |  |

The perpendicular line segments are $\qquad$
The parallel line segments are $\qquad$
11. Copy the set of parallel lines on the blank grid provided.

Name: $\qquad$
12. Copy the pair of perpendicular lines on the blank grid provided.
